

# Isle of Wight County, VA

Risk-assessment baseline packet

County FIPS: 51093    Release: 2026-10    Data as of: 2026-09-30    Storm Events data through: 2026-06-30

Hazard Plain is an independent product built from public federal data. It is not a FEMA document and is not reviewed or endorsed by FEMA or any state agency.

## Summary

Plan status as of 2026-09-30: Approved, expires 2027-06-07. Plan: PDC 23 Hampton Roads Hazard Mitigation Plan (FEMA plan 108315), approved 2022-06-08.  
Update: FEMA tracker shows a plan in progress.  
Since the plan was approved on 2022-06-08: 1 new hazard declaration (1 incident): EM-3631-VA (Severe Winter Storm).  
NOAA Storm Events records since that date: 39 records (data through 2026-06-30).  
Highest expected annual loss (FEMA National Risk Index, modeled total; see B1-a): Inland Flooding (\$5,464,300 a year), Hurricane (\$3,574,851) and Drought (\$2,454,107).  
Repetitive-loss flood properties now: FMA RL 5, SRL 6 (44 CFR 77.2); any definition: 30.  
The tables that follow are organized by the items of FEMA's Local Mitigation Plan Review Tool, Element B (B1-a to B2-c); each heading says which item its tables support.

## TERMS USED

**EAL:** expected annual loss: FEMA's modeled average yearly loss from a hazard.  
**NRI:** FEMA's National Risk Index (version 1.20, December 2025).  
**NFIP:** National Flood Insurance Program.  
**RL, SRL:** repetitive loss and severe repetitive loss: flood-insured properties with repeated claims (definitions in B2-c).  
**FMA, HMGP:** Flood Mitigation Assistance and Hazard Mitigation Grant Program, FEMA mitigation grants.  
**PA:** FEMA Public Assistance: disaster aid to governments and some nonprofits.  
**Zone-level:** NOAA logged the event for a National Weather Service forecast zone, which may include parts of neighboring counties.  
**County-coded:** NOAA logged the event to this county.  
**FIPS:** the federal code for a place; 51093 is this area.  
**D0 to D4:** U.S. Drought Monitor categories, from abnormally dry (D0) to exceptional drought (D4).  
**F/EF, EFU:** Fujita and Enhanced Fujita tornado ratings; EFU is an unrated tornado.  
**kt, CONUS:** knots (1 kt is about 1.15 mph); the contiguous United States.  
**CFR:** Code of Federal Regulations.  
**A4-a, E1-a:** other items of FEMA's Local Mitigation Plan Review Tool (sources, and changes since the last plan).  
**Dollars:** nominal (as reported, labeled with the year), not adjusted for inflation.

Plan 108315 covers 24 other participants, named in the Excel file.

State plan status and tribal plans in this state: see the state page.

## Supports FEMA checklist item B1-a: hazard identification

Hazards NRI does not cover (local data needed)

- dam failure (incl. upstream dams)
- levee failure
- flash flood as its own subtype
- ice jams
- debris flows
- erosion (riverine and coastal)
- land subsidence and sinkholes
- expansive soils

|                | Tsunami        | Insufficient Data  | Insufficient Data   | n/a                                                  | n/a                                                    | n/a                                                                                                         | n/a                                                            | 0                                                              | No recorded events in Storm Events since 1996 (data through 2026-06-30). |

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

NRI risk rating combines expected annual loss with social vulnerability and community resilience; EAL rating rates expected annual loss alone. Both compare this county with all U.S. counties.

Local data needed: state and local wildfire, landslide and tsunami records (Storm Events records these hazards only in part).

*Not applicable to this county per NRI, with no federal declaration and no Storm Events record since 1996: avalanche and volcanic activity. That is the evidence for leaving them out of the plan.*

The state hazard mitigation plan also lists hazards for this county; FEMA asks the plan to explain any hazard it leaves out.

## Supports FEMA checklist item B1-b: hazard location

Affects the whole county (national data give no location within it): Cold Wave, Drought, Hail, Heat Wave, Ice Storm, Lightning, Strong Wind and Winter Weather.

Coastal Flooding and Inland Flooding: The FEMA Flood Insurance Rate Map (FIRM) is the required location source for flooding. See the FEMA Flood Map Service Center (<https://msc.fema.gov>) for this county.

### Hazards that vary within the county: highest-rated census tracts

Source: 5

| Hazard     | Highest-rated census tracts<br><i>NRI risk rating, score 0 to 100</i>                                                     |
|------------|---------------------------------------------------------------------------------------------------------------------------|
| Earthquake | tract 2801.05 (Relatively Low, 70.5); tract 2803 (Relatively Low, 65.3); tract 2804 (Relatively Low, 51.4)                |
| Hurricane  | tract 2803 (Relatively High, 93.0); tract 2801.05 (Relatively High, 91.4); tract 2802 (Relatively High, 90.4)             |
| Landslide  | tract 2801.01 (Relatively Low, 82.9); tract 2801.05 (Very Low, 79.9); tract 2803 (Very Low, 77.0)                         |
| Tornado    | tract 2803 (Relatively Moderate, 64.5); tract 2801.05 (Relatively Moderate, 63.6); tract 2804 (Relatively Moderate, 54.8) |
| Tsunami    | no tract has a National Risk Index rating for this hazard                                                                 |
| Wildfire   | tract 2801.07 (Relatively Low, 84.1); tract 2801.08 (Relatively Low, 83.5); tract 2801.04 (Relatively Low, 79.8)          |

Up to 3 census tracts per hazard, highest National Risk Index rating first, then highest score; a tract number is the Census tract number (for example 2801.05 is Census Tract 2801.05). FEMA's Resilience Analysis and Planning Tool maps the National Risk Index for every tract: <https://www.fema.gov/emergency-managers/practitioners/resilience-analysis-and-planning-tool>

## Supports FEMA checklist item B1-c: hazard extent

### Extent: scale, observed range and worst recorded event per hazard

| Wildfire                                                                    | acres burned<br>(local data)        | 0                                        |                |                                                                                          |                                   |                                  | Acres burned: in event narratives only (local data needed). |
| Winter Storm, Heavy Snow, Blizzard, Lake-Effect Snow, Winter Weather, Sleet | none in data (snowfall: local data) | 61 records, 1996 to 2025 (61 zone-level) |                | Winter Weather, 2021-02-13, \$20,000 property; \$0 crops (2021 dollars); NWS zone VAZ093 |                                   | Countywide (zone-level records). | Snow depth: in event narratives only (local data needed).   |

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records whose zone no NWS zone-county file places in this county (mostly before 2020) are not counted here (the Methods page explains the zone matching).

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

## Supports FEMA checklist item B1-d: previous occurrences

Federal declarations for this county: 20 declarations covering 15 separate hazard incidents counted in this packet (declarations for the same incident count once; non-natural and evacuation-only declarations are not counted).

| 2017-02-25 | Hail                                        | 1.75 in                                       | \$0 property; \$0 crops (2017 dollars)                                         | 0, 0                                      | SMITHFIELD                                  |                                          | B1-c worst recorded: Hail                                           |
| 2012-10-28 | Coastal Flood                               |                                               | \$100,000 property; \$0 crops, reported for the zone (2012 dollars)            | 0, 0                                      | NWS zone VAZ093 (ISLE OF WIGHT), zone-level |                                          | B1-c worst recorded: Coastal Flood, Storm Surge/Tide                |
| 2012-07-05 | Heat                                        |                                               | \$0 property; \$0 crops, reported for the zone (2012 dollars)                  | 0, 0                                      | NWS zone VAZ093 (ISLE OF WIGHT), zone-level |                                          | B1-c worst recorded: Excessive Heat, Heat                           |
| 2012-06-29 | Thunderstorm Wind                           | 64 kt (74 mph) measured gust                  | \$2,000 property; \$0 crops (2012 dollars)                                     | 0, 0                                      | MAYNARDS XRDS                               |                                          | B1-c worst recorded: Thunderstorm Wind                              |
| 2011-04-16 | Tornado                                     | EF2, 22.61 mi within this county, 400 yd wide | \$300,000 property; \$0 crops (2011 dollars)                                   | 0, 0                                      | BALLARDS XRDS to LAWSON                     |                                          | B1-c worst recorded: Tornado                                        |
| 2006-10-07 | Flash Flood                                 |                                               | \$3,000,000 property; \$80,000 crops (2006 dollars)                            | 0, 0                                      | WINDSOR                                     |                                          | B1-c worst recorded: Flash Flood, Flood, Lakeshore Flood            |
| 2003-09-18 | Hurricane (Typhoon), NOAA's event type name |                                               | damage not reported                                                            | 1, 0                                      | NWS zone VAZ093 (ISLE OF WIGHT), zone-level |                                          | deaths or injuries recorded                                         |
| 2000-05-29 | High Wind                                   | 40 kt (46 mph) estimated                      | damage not reported                                                            | 1, 3                                      | NWS zone VAZ093 (ISLE OF WIGHT), zone-level |                                          | deaths or injuries recorded                                         |
| 1999-09-15 | Hurricane (Typhoon), NOAA's event type name |                                               | \$5,200,000 property; \$6,100,000 crops, reported for the zone (1999 dollars)  | 0, 0                                      | NWS zone VAZ093 (ISLE OF WIGHT), zone-level |                                          | B1-c worst recorded: Hurricane, Tropical Storm, Tropical Depression |
| 1997-09-01 | Drought                                     |                                               | property not reported; \$3,890,000 crops, reported for the zone (1997 dollars) | 0, 0                                      | NWS zone VAZ093 (ISLE OF WIGHT), zone-level |                                          | B1-c worst recorded: Drought                                        |

The full list is in the Excel file, sheet "B1-d Storm Events history" (340 rows).

Location is the place NOAA recorded, as written in its data; it need not be a jurisdiction in this plan.

Local data needed: state-declared emergencies, from your state emergency management agency (federal data do not include them).

Tribal and special-area declarations in this state are listed on the state page.

## Supports FEMA checklist item B1-e: probability of future events

### Probability: FEMA annualized frequency and descriptor per hazard

FEMA annualized frequency (modeled) is the National Risk Index v1.20 (December 2025) estimate of how often a hazard affects this county in a year; it is not recorded events divided by years, and its unit differs by hazard (events, event-days, or days with a lightning strike per year). For earthquake, wildfire, coastal flooding and tsunami the value is the chance (or number of events) at a location in the county, not across the county, so no "1 in N years" is given and the descriptor comes from Storm Events where it has a record (none for earthquake). The Methods page gives each hazard's method, from FEMA's National Risk Index Technical Documentation v1.20.

Where NRI gives event-days, the descriptor comes from the share of years with a Storm Events record; NRI's source records more events, so the two differ.

Descriptor scale used in this packet (defined per unit)

The bands show how often events of each severity were recorded in this county, to profile how severe events have been (FEMA's probability item asks for the range of intensities).

Hail smaller than 1 inch is not counted: on 2010-01-05 the National Weather Service raised its severe-hail threshold from 3/4 inch to 1 inch, so smaller reports became less common after 2009 (NWS Service Change Notice 09-52). NRI hail frequency uses a 0.75 inch threshold.

Optional: future conditions. Not a required item in the 2025 FEMA Local Mitigation Planning Policy Guide; some states ask for it. The federal Climate Mapping for Resilience and Adaptation (CMRA) site gives county exposure to future climate conditions (<https://resilience.climate.gov/>).

Drought: Agriculture is all of NRI's expected annual loss for this hazard in the county, so the tract range mostly reflects where crop and livestock value is.

Rated tracts only: No Rating (score 0.0), Not Applicable and Insufficient Data tracts are counted but not used for the minimum, median and maximum.

The score ranks a tract against all U.S. tracts (100 = highest). The rating is FEMA's category for the tract's risk value, computed differently, so the two can disagree.

Frequency data for cold wave, drought, hail, heat wave, ice storm, lightning, strong wind and winter weather are county-wide or coarse (49 km grid or NWS zone), the same for every jurisdiction; the tract range mostly reflects where buildings and people are (crop and livestock value where a line above names agriculture).

Repetitive-loss counts are for whole NFIP communities, which can extend beyond this county (see the note in B2-c).

County Public Assistance in B1-d also includes applicants filed under the county that are not jurisdictions in this plan (for example state agencies, special districts and nonprofits), so the jurisdiction rows add up to less.

## Supports FEMA checklist items B2-a and B2-b: vulnerability and potential impacts

Local data needed

The table below gives county-level starting figures; the plan describes impacts for each jurisdiction and its own assets.

- Critical facilities and lifelines per hazard
- A problem statement per jurisdiction per hazard
- Changes in development in hazard-prone areas since the last approval, or a statement of none (E1-a)
- Future assets

Totals since 2022-06-08 (Storm Events through 2026-06-30): 29 county-coded records, 29 with a damage value recorded (including \$0), \$146,000; 10 zone-level records, 7 with a damage value recorded (including \$0), \$2,000 reported for the zone; Public Assistance: none recorded on the 1 counted declaration.

FEMA does not split Public Assistance by hazard. A declaration mapped to several hazards is listed under each of them with its full amount, so the per-hazard column does not add up to the total; the unit total counts each declaration once.

NRI computes earthquake exposure on its own basis, so it exceeds the county building value in B2-a.

## Supports FEMA checklist item B2-a: vulnerability (county context)

### County context

| Social vulnerability rating                                                                                                                                                   | Very Low        |
| Community resilience rating                                                                                                                                                   | Relatively High |
| NRI version                                                                                                                                                                   | December 2025   |

FEMA's all-hazard expected annual loss adds buildings, agriculture and population equivalence; this table gives the property part and the population-equivalence part as separate rows.

Social vulnerability: higher means people are more likely to be harmed and slower to recover. Community resilience: lower means the community is less able to recover. High social vulnerability and low resilience both raise the NRI risk rating.

## Supports FEMA checklist item B2-c: repetitive loss properties

### Repetitive loss in this county, both definitions

Sources: 1, 4

| Definition                                    | Properties | Severe repetitive loss                               | Properties |
|-----------------------------------------------|------------|------------------------------------------------------|------------|
| Repetitive loss, FMA definition (44 CFR 77.2) | 5          | Severe repetitive loss, FMA definition (44 CFR 77.2) | 6          |
| Repetitive loss, NFIP insurance definition    | 28         | Severe repetitive loss, NFIP insurance definition    | 2          |

The state NFIP coordinator's list, the source FEMA's Handbook names, often uses the NFIP insurance definition (second row).

### Repeat-flood properties: county and state-level rows

| Smithfield town      | 510081            | 1                            | 1                             | 6                             | 0                              | 6                                 | 0                              | 3                                      |
| Windsor town         | 510295            | 0                            | 0                             | 0                             | 0                              | 0                                 | 0                              | 0                                      |

Counts by occupancy group for each jurisdiction are in the Excel file, sheet "B2-c Jurisdictions".

Jurisdiction rows are whole NFIP communities and need not add up to the county total: a community that extends into another county is counted in full on each jurisdiction row, while the county table counts only its part in this county.

FEMA's occupancy groups have no institutional class; institutional properties are counted in non-residential or other residential in the table by occupancy group.

FMA RL and FMA SRL are the Flood Mitigation Assistance definitions (44 CFR 77.2), the ones the FEMA Local Mitigation Planning Policy Guide cites. NFIP repetitive loss (the FEMA insurance definition) is 2 or more claims over \$1,000 in 10 years, and a property can leave that group once it is mitigated. Also shown: NFIP severe repetitive loss, any category, mitigated and currently insured. The Methods page gives the OpenFEMA field details.

Counts are aggregates of FEMA's public NFIP Multiple Loss Properties file (FEMA's data date 2026-08-02; file version 2026-08-04). No property is identified. County assignment is FEMA's geocode.

In this county 0 properties are FMA repetitive loss but not NFIP repetitive loss, and 23 properties are NFIP repetitive loss but not FMA repetitive loss.

Exact counts; no count suppression.

## What this packet is and what the plan adds

This packet is the federal data for the plan's risk assessment, organized by the items of FEMA's Local Mitigation Plan Review Tool, Element B. Each section heading names the item its tables support; the plan and FEMA's review decide whether the item is met.

The plan adds what only the community has: local data on assets, critical facilities, development and each jurisdiction's impacts; local hazard history, including state-declared emergencies; the mitigation strategy; and adoption.

How the federal data are built: National Risk Index values are FEMA's model, not counts of events. Storm Events is more complete from 1996; zone-level records are placed by forecast zone, not by location in the county. Public Assistance for a jurisdiction is matched by applicant name. The Methods page gives every rule and the known edge cases.

---

## OpenFEMA disclaimer

This product uses the Federal Emergency Management Agency's OpenFEMA API, but is not endorsed by FEMA. The Federal Government or FEMA cannot vouch for the data or analyses derived from these data after the data have been retrieved from the Agency's website(s).
