

Waldo County, ME

Risk-assessment baseline packet

Unit **County area 23027** Release **2026-10** As of **2026-09-28** Storm Events data through **2026-06-30**

Hazard Plain is an independent product built from public federal data. It is not a FEMA document and is not reviewed or endorsed by FEMA or any state agency.

A starting point for the plan's risk assessment (FEMA Local Mitigation Plan Review Tool, Element B). It does not replace local data or FEMA review. Section headings say which FEMA review item each table supports; whether an item is satisfied is decided by the plan and its reviewers.

OPENFEMA DISCLAIMER

This product uses the Federal Emergency Management Agency's OpenFEMA API, but is not endorsed by FEMA. The Federal Government or FEMA cannot vouch for the data or analyses derived from these data after the data have been retrieved from the Agency's website(s).

Plan clock

No county-level plan row in FEMA data

What changed since your last plan

Not available. No county-level plan row in FEMA data, so there is no approval date to count from.

Supports B1-a: hazards

Hazards NRI does not cover: check locally

- dam failure (incl. upstream dams)
 - levee failure
 - flash flood as its own subtype
 - ice jams
- debris flows
 - erosion (riverine and coastal)
 - land subsidence and sinkholes
 - expansive soils

The 18 National Risk Index hazards, ranked by expected annual loss (EAL)

Rank by EAL	Hazard	NRI risk rating	EAL rating	EAL buildings modeled dollars per year	EAL agriculture modeled dollars per year	EAL population equivalence statistical value of life and injury, \$13.7M per life, not property damage	EAL total (see note) modeled dollars per year	Storm Events records since 1996 count	Evidence for an omission NRI Not Applicable, no declaration and no Storm Events record since 1996	Storm Events coverage note
1	Inland Flooding	Relatively Low	Relatively Low	\$5,065,880	\$1	\$3,122	\$5,069,003	50		
2	Hurricane	Relatively Moderate	Relatively Moderate	\$2,966,999	\$125,952	\$54,587	\$3,147,539	4		
3	Cold Wave	Relatively Low	Relatively Moderate	\$291	\$8,313	\$1,502,550	\$1,511,154	26		Includes 1 Frost/Freeze record, event types the NRI definition of this hazard leaves out.
4	Ice Storm	Relatively High	Relatively High	\$934,455		\$37,024	\$971,479	4		
5	Winter Weather	Relatively High	Relatively High	\$261,674	\$29	\$633,860	\$895,563	185		
6	Lightning	Relatively Moderate	Relatively Moderate	\$25,597		\$442,427	\$468,023	4		
7	Coastal Flooding	Relatively Low	Relatively Low	\$434,396		\$463	\$434,860	15		
8	Drought	Relatively Low	Relatively Low		\$216,446		\$216,446	23		
9	Strong Wind	Relatively Low	Relatively Low	\$12,045	\$425	\$191,892	\$204,363	122		Includes 24 High Wind records and 37 Strong Wind records, event types the NRI definition of this hazard leaves out.

Rank by EAL	Hazard	NRI risk rating	EAL rating	EAL buildings <i>modeled dollars per year</i>	EAL agriculture <i>modeled dollars per year</i>	EAL population equivalence <i>statistical value of life and injury, \$13.7M per life, not property damage</i>	EAL total (see note) <i>modeled dollars per year</i>	Storm Events records since 1996 <i>count</i>	Evidence for an omission <i>NRI Not Applicable, no declaration and no Storm Events record since 1996</i>	Storm Events coverage note
10	Earthquake	Very Low	Very Low	\$170,459		\$19,173	\$189,632			Not in Storm Events. Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
11	Tornado	Very Low	Very Low	\$45,697	\$71	\$113,737	\$159,505	0		No recorded events in Storm Events since 1996 (data through 2026-06-30).
12	Hail	Very Low	Very Low	\$77,865	\$2,783	\$8,604	\$89,253	15		
13	Heat Wave	Very Low	Very Low	under \$1	\$2,105	\$62,481	\$64,586	2		
14	Wildfire	Very Low	Very Low	\$6,055	\$2	\$572	\$6,629	0		No recorded events in Storm Events since 1996 (data through 2026-06-30). Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
15	Landslide	Very Low	Very Low	\$1,319		\$1,615	\$2,933	0		Declared 1 time; no Storm Events record of this type. Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
16	Avalanche	Very Low	Very Low	\$0		\$20	\$20	0		No recorded events in Storm Events since 1996 (data through 2026-06-30).
	Tsunami	Insufficient Data	Insufficient Data					0		No recorded events in Storm Events since 1996 (data through 2026-06-30). Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
	Volcanic Activity	Not Applicable	Not Applicable					0	NRI rates volcanic activity Not Applicable for this county, and no federal declaration for this county names it.	No recorded events in Storm Events since 1996 (data through 2026-06-30). Storm Events coverage of this hazard is limited; absence is not evidence of low risk.

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

Check your state hazard mitigation plan's hazard list for this county; explain any hazard you drop.

Supports B1-b: location

Where each hazard occurs

Hazard	Location	Census tracts rated <i>rated of all tracts</i>
Avalanche	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	2 of 8
Coastal Flooding	The FEMA Flood Insurance Rate Map (FIRM) is the required location source for flooding. See the FEMA Flood Map Service Center (https://msc.fema.gov) for this county.	4 of 8

Hazard	Location	Census tracts rated <i>rated of all tracts</i>
Cold Wave	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Drought	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Earthquake	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	8 of 8
Hail	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Heat Wave	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Hurricane	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	8 of 8
Ice Storm	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Inland Flooding	The FEMA Flood Insurance Rate Map (FIRM) is the required location source for flooding. See the FEMA Flood Map Service Center (https://msc.fema.gov) for this county.	8 of 8
Landslide	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	8 of 8
Lightning	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Strong Wind	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8
Tornado	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	8 of 8
Tsunami	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	0 of 8
Volcanic Activity	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	0 of 8
Wildfire	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	8 of 8
Winter Weather	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	8 of 8

FEMA, FEMA National Risk Index 1.20.0 (December 2025), county and census tract tables, version 1.20.0, pulled 2026-09-28, https://www.fema.gov/about/reports-and-data/openfema/nri/v120/NRI_Table_Counties.zip (download, 25 MB), https://www.fema.gov/about/reports-and-data/openfema/nri/v120/NRI_Table_CensusTracts.zip (download, 635 MB)

Supports B1-c: extent

Extent: scale, observed range and worst recorded event per hazard

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Avalanche	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Coastal Flood, Storm Surge/ Tide	none in data (FIRM for depth)	15, 1996 to 2024 (13 zone-level)		Coastal Flood, 2007-04-16, \$1,100,000 property; \$0 crops, reported for the zone (2007 dollars); NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties		No event record names a member place. Zone-level records (13) apply countywide.	Flood depth: see the FEMA Flood Insurance Rate Map.

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Cold/Wind Chill, Extreme Cold/Wind Chill	wind chill	25, 1998 to 2023 (25 zone-level)	1 day to 4 days (median 2 days); 23 with a recorded value	4 consecutive days, 2004-01-13 to 2004-01-16, zone-level		Zone-level records: applies countywide; national data do not locate these events within the county.	Wind chill: in event narratives only; local data required.
Frost/Freeze (outside NRI Cold Wave definition)	crop damage	1, 2023 to 2023 (1 zone-level)		No crop damage reported in 1 records.		Zone-level records: applies countywide; national data do not locate these events within the county.	Temperature: in event narratives only; local data required.
Drought	US Drought Monitor D-scale	23, 1999 to 2026 (23 zone-level)	1 day to 212 days (median 61 days); 9 with a recorded value	212 days (7 months), 2025-11-01 to 2026-05-31, a run of 7 consecutive Storm Events drought records, zone-level	Drought, 2020-10-01, \$0 property; \$500,000 crops, reported for the zone (2020 dollars)	Zone-level records: applies countywide; national data do not locate these events within the county.	Storm Events enters a drought at D2 or worse east of the Rockies and D3 or worse from the Rockies west (NWS Instruction 10-1605); NRI drought counts D3 and D4 only.
Earthquake	Modified Mercalli (local data)	0					No Storm Events record; local data required (e.g., USGS).
Hail	hail size (inches)	20, 1983 to 2022	0.75 in to 2 in (median 1 in); 20 with a recorded value	2 in hail, 1996-08-18		Event records naming member places: Liberty town (2 records), Lincolnville town (2 records), Northport town (1 record), Swanville town (1 record).	
Excessive Heat, Heat	heat index (narratives)	2, 1998 to 1998 (2 zone-level)		No in-season record among 2 records, so no run is shown (see the note).		Zone-level records: applies countywide; national data do not locate these events within the county.	Heat index: in event narratives only; local data required. Heat records from November to March (unseasonable warmth, not a heat wave) are counted but not used for the longest run.
Hurricane, Tropical Storm, Tropical Depression	Saffir-Simpson	4, 1996 to 2023 (4 zone-level)		Strongest recorded (records with damage, a wind speed or direct casualties first, then storm type, category and wind): Tropical Storm record, 2023-09-16, property not reported; \$0 crops, reported for the zone (2023 dollars), 1 direct death (reported for the zone); NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Storm Events files every zone of a storm's episode under the storm's event type and category, so a Hurricane (Typhoon) record, especially an inland or remnant one, does not by itself mean hurricane-force winds here; read the damage and wind columns.

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Ice Storm	Sperry-Piltz (local data)	4, 1996 to 2013 (4 zone- level)		Ice Storm, 1998-01-05, \$20,000,000 property; crops not reported, reported for the zone (1998 dollars); NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Ice thickness: in event narratives only; local data required.
Flash Flood, Flood, Lakeshore Flood	damage and flood days (FIRM for depth)	50, 1996 to 2024 (9 zone- level)		Flood, 2007-04-16, \$1,100,000 property; \$0 crops (2007 dollars)		Event records naming member places: Lincolnville town (4 records), Liberty town (3 records), Searsport town (3 records), Islesboro town (2 records), Northport town (2 records). Zone-level records (9) apply countywide.	Flood depth: see the FEMA Flood Insurance Rate Map. Storm Events damage can be \$0 or blank even for a major flood, so the worst record here may not be the worst flood; compare FEMA Public Assistance by declaration in B1-d.
Debris Flow	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Lightning	annualized frequency (the measure FEMA's Local Mitigation Planning Handbook names)	4, 1996 to 2004		Lightning, 2004-07-02, \$100,000 property; crops not reported (2004 dollars)		Event records naming member places: Searsport town (1 record).	Storm Events lists lightning with damage or casualties; physical measure in event narratives only; local data required.
High Wind and Strong Wind (outside NRI Strong Wind definition)	wind speed (kt and mph)	61, 1996 to 2024 (61 zone- level)	30 kt (35 mph) to 63 kt (72 mph) (median 50 kt (58 mph)); 25 with a recorded value	63 kt (72 mph) measured gust, High Wind, 2023-12-18; NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties	High Wind, 1996-01-27, \$200,000 property; crops not reported, reported for the zone (1996 dollars)	Zone-level records: applies countywide; national data do not locate these events within the county.	
Thunderstorm Wind	wind speed (kt and mph)	69, 1985 to 2024	50 kt (58 mph) to 52 kt (60 mph) (median 50 kt (58 mph)); 62 with a recorded value	52 kt (60 mph) estimated gust, Thunderstorm Wind, 2021-06-30; same speed and measurement basis also recorded on 2009-08-07, 2021-06-19, 2021-06-30		Event records naming member places: Liberty town (5 records), Lincolnville town (3 records), Northport town (3 records), Freedom town (2 records), Islesboro town (2 records), Searsport town (2 records), Brooks town (1 record).	

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Tornado	Enhanced Fujita (F before Feb 2007)	3, 1954 to 1968	F/EF1 to F/EF2 (median F/EF1); 3 with a recorded value	F2 tornado, 1954-07-07, 7.6 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 10 yd wide, \$25,000 property; crops not recorded (1954 dollars), 1 direct injury		No event record names a member place.	From 1996 on, tornado records are per-county segments and length is the path length within this county (NWS Instruction 10-1605); records before 1996 may give the whole path length, including the path outside this county, and before 1996 a tornado is listed once, under the county where it began, with the whole path's rating; counties farther along the path may not list it. Length is not used to rank tornadoes.
Tsunami	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Volcanic Ash, Volcanic Ashfall	Volcanic Explosivity Index (local data)	0					Physical measure: in event narratives only; local data required.
Wildfire	acres burned (local data)	0					Acres burned: in event narratives only; local data required.
Winter Storm, Heavy Snow, Blizzard, Lake-Effect Snow, Winter Weather, Sleet	none in data (snowfall local)	185, 1996 to 2026 (185 zone-level)		No damage reported in 185 records.		Zone-level records: applies countywide; national data do not locate these events within the county.	Snow depth: in event narratives only; local data required.

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Notable Storm Events records

Date	Event type	Magnitude or extent	Damage <i>nominal dollars</i>	Direct deaths, injuries <i>indirect not counted</i>	Location	Flags	Why listed
2025-11-01	Drought		\$0 property; \$0 crops, reported for the zone (2025 dollars)	0, 0	NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties	within last 5 years	B1-c worst recorded: Drought

Date	Event type	Magnitude or extent	Damage <i>nominal dollars</i>	Direct deaths, injuries <i>indirect not counted</i>	Location	Flags	Why listed
2023-12-18	High Wind	63 kt (72 mph) measured gust	damage not reported	0, 0	NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties	within last 5 years	B1-c worst recorded: High Wind and Strong Wind (outside NRI Strong Wind definition)
2023-09-16	Tropical Storm		property not reported; \$0 crops, reported for the zone (2023 dollars)	1, 0	NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties	within last 5 years	deaths or injuries recorded
2021-06-30	Thunderstorm Wind	52 kt (60 mph) estimated gust	\$0 property; \$0 crops (2021 dollars)	0, 0	MONROE		B1-c worst recorded: Thunderstorm Wind
2007-04-16	Flood		\$1,100,000 property; \$0 crops (2007 dollars)	0, 0	BELFAST		B1-c worst recorded: Flash Flood, Flood, Lakeshore Flood
2007-04-16	Coastal Flood		\$1,100,000 property; \$0 crops, reported for the zone (2007 dollars)	0, 0	NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties		B1-c worst recorded: Coastal Flood, Storm Surge/Tide
2004-07-02	Lightning		\$100,000 property; crops not reported (2004 dollars)	0, 0	SEARSMONT		B1-c worst recorded: Lightning
2004-01-13	Cold/Wind Chill		damage not reported	0, 0	NWS zone MEZ022 (INTERIOR WALDO), zone-level: may include parts of neighboring counties		B1-c worst recorded: Cold/Wind Chill, Extreme Cold/Wind Chill
1998-01-05	Ice Storm		\$20,000,000 property; crops not reported, reported for the zone (1998 dollars)	0, 0	NWS zone MEZ028 (COASTAL WALDO), zone-level: may include parts of neighboring counties		B1-c worst recorded: Ice Storm
1996-08-18	Hail	2 in	damage not reported	0, 0	LINCOLNVILLE CENTER		B1-c worst recorded: Hail
1968-07-01	Tornado	F1, 0.3 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 27 yd wide	\$2,500 property; crops not recorded (1968 dollars)	0, 2	location not recorded		deaths or injuries recorded
1954-07-07	Tornado	F2, 7.6 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 10 yd wide	\$25,000 property; crops not recorded (1954 dollars)	0, 1	location not recorded		deaths or injuries recorded

The full list is in the XLSX file, sheet "B1-d Storm Events history" (466 rows).

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

State-declared emergencies are not in federal data. Add them from your state emergency management agency.

Tribal and special-area declarations in this state are listed on the state page.

Supports B1-e: probability

Probability: FEMA annualized frequency and descriptor per hazard

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area-weighted, so can be fractional)	NRI period	Location	Note
Avalanche	0.01	events per year	about 1 in 100 years	Possible	FEMA annualized frequency (modeled)	0	1994 to 2023 (30 years)	see B1-f	0.01 is NRI's minimum avalanche frequency for a county in an avalanche susceptibility zone; NRI records no avalanche here, so the descriptor reflects the floor, not local events.
Coastal Flooding	10.6	events per year at a location (modeled)	about 11 per year at a given location in the county	Highly likely	FEMA annualized frequency (modeled)	not shown	modeled	see B1-f	Descriptor from NRI: the rate at a location is 1 or more a year, so the county rate is at least that.
Cold Wave	3.3	event-days per year	about 3.3 days per year	Likely	event-days in 8 of 30 years, 1996 to 2025 (26.7%)	59.5	2005-11-12 to 2024-11-12 (19 years)	countywide	NRI gives about 3.3 cold wave event-days a year here (its annualized frequency over 19 years; not its event count divided by the years), but Storm Events has a record in only 8 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together. Frost/Freeze records are not counted in this descriptor: they record crop freezes, not cold waves.
Drought	4.16	event-days per year	about 4.16 days per year	Likely	event-days in 5 of 30 years, 1996 to 2025 (16.7%)	105	2000 to 2025 (25.25 years; D3 and D4 only)	countywide	NRI gives about 4.16 drought event-days a year here (its annualized frequency over 25.25 years; not its event count divided by the years), but Storm Events has a record in only 5 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.
Earthquake	0.00165	annual probability at a location	chance a given location in the county has at least minor- damage shaking in a year: 0.165%			not shown	modeled	see B1-f	Descriptor not assigned: the NRI value is the chance at a location in the county, not how often the hazard affects the county, and Storm Events does not record earthquakes.
Hail	0.717	events per year	about 0.72 per year	Likely	FEMA annualized frequency (modeled)	29.9 (modeled)	1986 to 2023 (38 years)	countywide	
Heat Wave	1.84	event-days per year	about 1.84 days per year	Possible	event-days in 1 of 30 years, 1996 to 2025 (3.33%)	30.4	2005-11-12 to 2024-11-12 (19 years)	countywide	NRI gives about 1.84 heat wave event-days a year here (its annualized frequency over 19 years; not its event count divided by the years), but Storm Events has a record in only 1 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area-weighted, so can be fractional)	NRI period	Location	Note
Hurricane	0.0938	events per year	about 1 in 11 years	Possible	FEMA annualized frequency (modeled)	34	1851 to 2024 (Atlantic)	see B1-f	NRI counts hurricane and tropical storm tracks passing within storm-force wind range; federal declarations are counted separately in B1-d and need not match.
Ice Storm	1.25	event-days per year	about 1.25 days per year	Likely	event-days in 4 of 30 years, 1996 to 2025 (13.3%)	85	1946-12-31 to 2014-02-12 (67 years)	countywide	NRI gives about 1.25 ice storm event-days a year here (its annualized frequency over 67 years; not its event count divided by the years), but Storm Events has a record in only 4 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.
Inland Flooding	0.786	event-days per year	about 0.786 days per year	Likely	event-days in 14 of 30 years, 1996 to 2025 (46.7%)	22	1996 to 2023 (28 years)	see B1-f	
Landslide	0.426	events per year (modeled)	about 1 in 2 years	Likely	FEMA annualized frequency (modeled)	not shown	modeled	see B1-f	
Lightning	15	days per year with a strike	about 15 days per year	Highly likely	FEMA annualized frequency (modeled)	not shown	1995 to 2023 (29 years; CONUS)	countywide	
Strong Wind	0.691	events per year	about 0.69 per year	Likely	FEMA annualized frequency (modeled)	26	1986 to 2023 (38 years)	countywide	
Tornado	0.0284	events per year	about 1 in 35 years	Possible	FEMA annualized frequency (modeled)	not shown	1950 to 2023 (EF2+); 1986 to 2023 (EF0-1)	see B1-f	
Tsunami		annual probability at the most exposed location (used in place of a county value)			Storm Events records in 0 of 30 years, 1996 to 2025 (0%)	not shown	modeled	see B1-f	No Storm Events record of this hazard, 1996 to 2025; descriptor not assigned (the NRI value is the chance at a location in the county, not how often the hazard affects the county)
Volcanic Activity		annual probability				not shown	modeled	see B1-f	Not Applicable in NRI for this county; no descriptor.
Wildfire	0.0000109	annual probability at a location	chance a given location in the county burns in a year: 0.00109%		Storm Events records in 0 of 30 years, 1996 to 2025 (0%)	not shown	modeled	see B1-f	No Storm Events record of this hazard, 1996 to 2025; descriptor not assigned (the NRI value is the chance at a location in the county, not how often the hazard affects the county)

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area-weighted, so can be fractional)	NRI period	Location	Note
Winter Weather	31.9	event-days per year	about 31.9 days per year	Highly likely	event-days in 29 of 30 years, 1996 to 2025 (96.7%)	572	2005-11-12 to 2024-11-12 (19 years)	countywide	

FEMA annualized frequency (modeled) comes from the National Risk Index v1.20 (December 2025). It is not recorded events divided by years, and what it measures depends on the hazard. For most hazards it estimates how often the hazard affects this county each year: it counts events or event-days (drought, heat wave, cold wave, winter weather, ice storm and inland flooding are in days per year; lightning is the number of days per year with a recorded cloud-to-ground strike, from the NOAA Storm Prediction Center daily lightning climatology); it may count events in the surrounding area (hail, strong wind, tornado, hurricane and ice storm use a 49 km grid and buffers) and is averaged over the county's area; and some hazards use a minimum value for places with no recorded event. Earthquake, wildfire and coastal flooding are different: FEMA computes them for each census block and averages them over the county, so the value is the chance (for coastal flooding, the modeled number of floods per year) at a location in the county, which is lower than the chance that the hazard strikes somewhere in the county. Earthquake is the chance of at least minor-damage shaking (U.S. Geological Survey model); wildfire is the chance that a location burns in a large fire (U.S. Forest Service burn probability); coastal flooding comes from FEMA flood zones and NOAA high-tide flooding, so it can be above 1 where high-tide flooding is frequent. Tsunami is the value at the county's most exposed location, from recorded events and modeled return periods. For these four hazards the packet gives no "1 in N years" and takes the descriptor from Storm Events (none for earthquake) unless the value is 1 or more a year. Landslide is a U.S. Geological Survey modeled county rate spread by slope susceptibility. Volcanic activity is the chance that a volcano affecting the county erupts in a year. Drought counts only extreme and exceptional drought (D3 and D4). Source: FEMA, National Risk Index Technical Documentation v1.20, sections 5.2.2 (Table 5), 5.2.3, 7.4, 10.4, 16.5, 17.1, 17.3.1, 17.5, 20.3.1, 21.4, 22.4 and 6 to 23.

Descriptor scale used in this packet (defined per unit)

Unit	Descriptor	Definition
events per year	Highly likely	1 or more per year
events per year	Likely	about once in 1 to 10 years
events per year	Possible	about once in 10 to 100 years
events per year	Unlikely	less than once in 100 years
annual probability	Likely	10% to under 100% chance in a given year
annual probability	Possible	1% to under 10% chance in a given year
annual probability	Unlikely	under 1% chance in a given year
event-days (share of years)	Highly likely	event-days recorded in 90% or more of years
event-days (share of years)	Likely	event-days recorded in 10% to under 90% of years
event-days (share of years)	Possible	event-days recorded in some years but under 10% of years
lightning strike-days	Highly likely	cloud-to-ground strikes on 1 or more days per year

Intensity bands: historical frequency (Storm Events)

Hazard	Band	Years	Events <i>county-coded records</i>	Years in period	Events per year <i>events / years</i>
Hail	1.00-1.99 in	1996 to 2025	9	30	0.3
Hail	2.00 in+	1996 to 2025	1	30	0.0333
Strong Wind (Thunderstorm Wind records)	50-64 kt	1996 to 2025	61	30	2.03
Strong Wind (Thunderstorm Wind records)	65 kt+	1996 to 2025	0	30	0
Strong Wind (Thunderstorm Wind records)	unmeasured or below 50 kt	1996 to 2025	0	30	0
Tornado	EF0-1	1996 to 2025	0	30	0
Tornado	EF2-3	1996 to 2025	0	30	0
Tornado	EF4-5	1996 to 2025	0	30	0
Tornado	unrated (EFU)	1996 to 2025	0	30	0

Hail smaller than 1 inch is not counted: on 2010-01-05 the National Weather Service raised its severe-hail threshold from 3/4 inch to 1 inch, so smaller reports became less common after 2009 (NWS Service Change Notice 09-52). NRI hail frequency uses a 0.75 inch threshold.

SOURCE
NOAA NCEI, NOAA NCEI Storm Events Database, details files (csvfiles v1.0), version c20260918, pulled 2026-09-28, <https://www.ncei.noaa.gov/pub/data/swdi/stormevents/csvfiles/>

Optional: future conditions. Not a required item in the 2025 FEMA Local Mitigation Planning Policy Guide; some states ask for it. The federal Climate Mapping for Resilience and Adaptation (CMRA) site gives county exposure to future climate conditions.

Supports B1-f: variation across the planning area

Range of census tract risk within the county

Hazard	Tracts <i>rated of all</i>	Risk score min <i>NRI score, 0 to 100</i>	Median	Max	Tracts by rating	Note
Avalanche	2 of 8	6.3	7.0	7.7	Very Low 2, Not Applicable 6	
Coastal Flooding	4 of 8	89.2	95.3	96.6	Relatively High 2, Relatively Moderate 2, No Rating 4	
Cold Wave	8 of 8	63.4	82.3	91.1	Relatively High 5, Relatively Moderate 3	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Drought	8 of 8	81.7	90.3	94.5	Relatively Moderate 3, Relatively Low 5	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. Agriculture is all of NRI's expected annual loss for this hazard in the county, so the tract range above mostly reflects where crop and livestock value is, not where buildings and people are. Confirm locally.
Earthquake	8 of 8	20.1	44.5	59.3	Relatively Low 5, Very Low 3	
Hail	8 of 8	45.5	59.1	66.6	Relatively Low 8	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Heat Wave	8 of 8	3.8	10.3	20.3	Relatively Low 2, Very Low 6	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.

Hazard	Tracts <i>rated of all</i>	Risk score min <i>NRI score, 0 to 100</i>	Median	Max	Tracts by rating	Note
Hurricane	8 of 8	82.4	89.0	91.4	Relatively High 3, Relatively Moderate 5	
Ice Storm	8 of 8	93.4	98.2	99.0	Very High 6, Relatively High 2	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.

Freedom town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 0	\$112,891.88	2; not yet covered	
Islesboro town	Town	Approved, expires 2031-05-11	FMA RL 0, SRL 0; any 0	\$511,405.51	4; 0	Includes \$7,127.23 for declarations not counted as hazard incidents (DR-4522-ME).
Liberty town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 0	\$348,904.94	10; not yet covered	Includes \$6,559.13 for declarations not counted as hazard incidents (DR-4522-ME).

Member	Type	Plan status	Repetitive loss	Public Assistance matched	Event records naming this place	Notes
			<i>FMA RL and SRL (44 CFR 77.2); repeat-flood, any definition</i>	<i>federal share obligated, nominal dollars</i>	<i>all years; since the member's plan</i>	
Lincolnville town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 1	\$229,622.50	9; not yet covered	
Northport town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 0	\$224,260.99	6; not yet covered	
Searsport town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 0	\$1,483,400.39	6; not yet covered	
Swanville town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 0	\$22,407.28	1; not yet covered	

Member rows are whole NFIP communities and need not add up to the county total: a community that extends into another county is counted in full on each member row, while the county table counts only its part in this county.

School districts and special districts get a plan clock row only.

Supports B2-a and B2-b: assets and impacts

Local data required

County-level starter. The plan must describe impacts for each participant and its own assets.

No county-level plan row in FEMA data, so there is no approval date to count from.

- Critical facilities and lifelines per hazard
 - A problem statement per participant per hazard
- Changes in development in hazard-prone areas since the last approval, or a statement of none (E1-a)
 - Future assets

County-level starter: exposure, expected annual loss and damage since the plan

Hazard	Building exposure	Agriculture exposure	Population exposed	EAL buildings	EAL agriculture	EAL population equivalence	EAL as % of exposure	Storm Events damage since plan	Zone-level damage since plan	Public Assistance since plan	Note
								<i>county-coded records, property plus crops, nominal dollars</i>	<i>property plus crops, reported for the zone</i>	<i>nominal dollars; see note</i>	
Avalanche	\$0		under 1	\$0		\$20					building exposure is 0 in NRI
Coastal Flooding	\$169,401,644		568	\$434,396		\$463	0.256%				

Hazard	Building exposure <i>modeled dollars</i>	Agriculture exposure <i>modeled dollars</i>	Population exposed <i>people</i>	EAL buildings <i>modeled dollars per year</i>	EAL agriculture <i>modeled dollars per year</i>	EAL population equivalence <i>statistical value of life and injury, \$13.7M per life, not property damage</i>	EAL as % of exposure <i>buildings; agriculture where noted</i>	Storm Events damage since plan <i>county-coded records, property plus crops, nominal dollars</i>	Zone-level damage since plan <i>property plus crops, reported for the zone</i>	Public Assistance since plan <i>nominal dollars; see note</i>	Note
Cold Wave	\$8,988,065,953	\$29,561,903	39,586	\$291	\$8,313	\$1,502,550	under 0.0001%				
Drought		\$9,739,745			\$216,446		2.22% (agriculture)				NRI has no building exposure for this hazard; agriculture shown
Earthquake	\$14,894,891,695		39,607	\$170,459		\$19,173	0.00114%				
Hail	\$8,988,065,953	\$29,561,903	39,586	\$77,865	\$2,783	\$8,604	0.000866%

Hurricane	\$8,988,065,953	\$29,561,903	39,586	\$2,966,999	\$125,952	\$54,587	0.033%				
Ice Storm	\$8,986,193,263		39,570	\$934,455		\$37,024	0.0104%				
Inland Flooding	\$8,966,445,130	\$480,266	531	\$5,065,880	\$1	\$3,122	n/a (see note)				NRI counts the full building value of any census block with some flood loss; this is not the value of buildings in the floodplain. Use local FIRM overlays for B2-a/B2-b. EAL as % of exposure: n/a.
Landslide	\$284,980,525		1,218	\$1,319		\$1,615	0.000463%				
Lightning	\$8,988,065,953		39,586	\$25,597		\$442,427	0.000285%				
Strong Wind	\$8,988,065,953	\$29,561,903	39,586	\$12,045	\$425	\$191,892	0.000134%				
Tornado	\$8,988,065,953	\$29,561,903	39,586	\$45,697	\$71	\$113,737	0.000508%				
Tsunami											NRI publishes no building exposure for this county
Volcanic Activity											Not Applicable in NRI for this county
Wildfire	\$5,900,853,906	\$23,837,845	27,107	\$6,055	\$2	\$572	0.000103%				
Winter Weather	\$8,988,065,953	\$29,561,903	39,586	\$261,674	\$29	\$633,860	0.00291%				

Totals since the plan: not available. No county-level plan row in FEMA data, so there is no approval date to count from.

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

FEMA does not split Public Assistance by hazard. A declaration mapped to several hazards is listed under each of them with its full amount, so the per-hazard column must not be added up; the unit total counts each declaration once.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Supports B2-a: context

County context

Measure	Value
Population	39,586
Building value (total, not at risk)	\$8,988,065,953
Agriculture value (total, not at risk)	\$29,561,903
NRI risk rating (all hazards)	Very Low
Expected annual loss, buildings and agriculture, all hazards	\$10,358,862
Expected annual loss, population equivalence, all hazards (NRI values each statistical life at \$13.7M; a modeled value of expected deaths and injuries, not property damage)	\$3,072,127
Social vulnerability rating	Relatively Low
Community resilience rating	Very High
NRI version	December 2025

FEMA's all-hazard expected annual loss total adds buildings, agriculture and population equivalence; the two parts are shown separately so the property figure is not read as including the statistical value of life.

Searsport town	230185	0	0	0	0	0	0	0	
Swanville town	230267	0	0	0	0	0	0	0	

Per-member types: XLSX sheet 'B2-c Members'.

Member rows are whole NFIP communities and need not add up to the county total: a community that extends into another county is counted in full on each member row, while the county table counts only its part in this county.

SOURCESFEMA, OpenFEMA NfipMultipleLossProperties v1, version 2026-08-04T164045Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/NfipMultipleLossProperties> (API)FEMA, OpenFEMA HazardMitigationPlanStatuses v1, version 2026-09-26T121003Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/HazardMitigationPlanStatuses> (API)**County repeat-flood properties by occupancy group**

Occupancy group	RL, FMA <i>properties</i>	SRL, FMA <i>properties</i>	RL, NFIP <i>properties</i>	SRL, NFIP <i>properties</i>	Any category <i>properties</i>	Mitigated <i>properties</i>	Currently insured <i>properties</i>
single-family residential	0	1	2	1	2	0	0
2 to 4 unit residential	0	0	0	0	0	0	0
other residential	0	0	0	0	0	0	0
non-residential	0	1	2	1	2	0	1
not reported	0	0	0	0	0	0	0

Institutional properties cannot be separated in this data: FEMA's occupancy groups have no institutional class, so they fall in non-residential or other residential in the table by occupancy group.

SOURCESFEMA, OpenFEMA NfipMultipleLossProperties v1, version 2026-08-04T164045Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/NfipMultipleLossProperties> (API)FEMA, OpenFEMA HazardMitigationPlanStatuses v1, version 2026-09-26T121003Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/HazardMitigationPlanStatuses> (API)

FMA RL and FMA SRL are the Flood Mitigation Assistance definitions (44 CFR 77.2), the ones the FEMA Local Mitigation Planning Policy Guide cites; OpenFEMA's fmaRL field description omits the Increased Cost of Compliance clause of 44 CFR 77.2(i). NFIP repetitive loss (FEMA insurance definition, nfipRL) is 2 or more claims over \$1,000 in 10 years and can drop to false when a property is mitigated. Also shown: NFIP severe repetitive loss, any category, mitigated and currently insured.

Your state NFIP coordinator's list may use the NFIP insurance definition, so its counts can be higher.

Counts are aggregates of FEMA's public NFIP Multiple Loss Properties file (as of 2026-08-02). No property is identified. County assignment is FEMA's geocode.

Counts may differ from your state NFIP coordinator's list, which is the source the Handbook names.

In this county 0 properties are FMA repetitive loss but not NFIP repetitive loss, and 4 properties are NFIP repetitive loss but not FMA repetitive loss.

Exact counts; no count suppression.
