Risk-assessment baseline packet

Unit **County area 34001** Release **2026-10** As of **2026-09-28** Storm Events data through **2026-06-30**

Hazard Plain is an independent product built from public federal data. It is not a FEMA document and is not reviewed or endorsed by FEMA or any state agency.

A starting point for the plan's risk assessment (FEMA Local Mitigation Plan Review Tool, Element B). It does not replace local data or FEMA review. Section headings say which FEMA review item each table supports; whether an item is satisfied is decided by the plan and its reviewers.

OPENFEMA DISCLAIMER

Wind chill: in event narratives only; local data required. Cold/ Wind Chill records from May to September (a frost night, not a cold wave) are counted but not used for the longest run.
Frost/Freeze (outside NRI Cold Wave definition)	crop damage	3, 2007 to 2007 (3 zone-level)		No crop damage reported in 3 records.		Zone-level records: applies countywide; national data do not locate these events within the county.	Temperature: in event narratives only; local data required.

Storm Events enters a drought at D2 or worse east of the Rockies and D3 or worse from the Rockies west (NWS Instruction 10-1605); NRI drought counts D3 and D4 only.
Earthquake	Modified Mercalli (local data)	0					No Storm Events record; local data required (e.g., USGS).
Hail	hail size (inches)	56, 1962 to 2021	0.75 in to 2 in (median 0.88 in); 55 with a recorded value	2 in hail, 1993-05-16; same size also recorded on 1980-06-03	Hail, 2008-08-10, \$0 property; \$5,000,000 crops (2008 dollars)	Event records naming member places: Absecon city (4 records), Egg Harbor City city (4 records), Hammonton town (4 records), Weymouth township (3 records), Linwood city (2 records), Atlantic City city (1 record), Brigantine city (1 record), Buena borough (1 record), Northfield city (1 record), Port Republic city (1 record).	

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Excessive Heat, Heat	heat index (narratives)	87, 1996 to 2015 (87 zone-level)	1 day to 10 days (median 3 days); 55 with a recorded value	10 consecutive days, 2002-08-11 to 2002-08-20, zone-level		Zone-level records: applies countywide; national data do not locate these events within the county.	Heat index: in event narratives only; local data required. Heat records from November to March (unseasonable warmth, not a heat wave) are counted but not used for the longest run.
Hurricane, Tropical Storm, Tropical Depression	Saffir-Simpson	7, 1996 to 2020 (7 zone-level)		Strongest recorded (records with damage, a wind speed or direct casualties first, then storm type, category and wind): Hurricane (Typhoon) record, 1999-09-16, \$500,000 property; crops not reported, reported for the zone (1999 dollars); NWS zone NJZ025 (EASTERN ATLANTIC), zone-level: may include parts of neighboring counties	Most damaging recorded: Tropical Storm, 2011-08-27, \$5,000,000 property; \$0 crops, reported for the zone (2011 dollars)	Zone-level records: applies countywide; national data do not locate these events within the county.	Storm Events files every zone of a storm's episode under the storm's event type and category, so a Hurricane (Typhoon) record, especially an inland or remnant one, does not by itself mean hurricane-force winds here; read the damage and wind columns.
Ice Storm	Sperry-Piltz (local data)	0					Ice thickness: in event narratives only; local data required.
Flash Flood, Flood, Lakeshore Flood	damage and flood days (FIRM for depth)	79, 1997 to 2025 (16 zone-level)		Flash Flood, 1997-08-20, \$54,000,000 property; crops not reported (1997 dollars)		Event records naming member places: Folsom borough (8 records), Atlantic City city (7 records), Buena borough (3 records), Hammonton town (3 records), Margate City city (3 records), Ventnor City city (3 records), Brigantine city (2 records), Northfield city (2 records), Absecon city (1 record), Egg Harbor City city (1 record); and 3 more member places (see the XLSX file). Zone-level records (16) apply countywide.	Flood depth: see the FEMA Flood Insurance Rate Map. Storm Events damage can be \$0 or blank even for a major flood, so the worst record here may not be the worst flood; compare FEMA Public Assistance by declaration in B1-d.
Debris Flow	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Lightning	annualized frequency (the measure FEMA's Local Mitigation Planning Handbook names)	26, 2001 to 2017		Lightning, 2011-09-15, \$0 property; \$0 crops (2011 dollars), 1 direct death, 2 direct injuries	Lightning, 2008-06-29, \$1,000,000 property; \$0 crops (2008 dollars)	Event records naming member places: Atlantic City city (3 records), Hammonton town (2 records), Margate City city (2 records), Northfield city (2 records), Absecon city (1 record), Brigantine city (1 record), Folsom borough (1 record), Longport borough (1 record), Pleasantville city (1 record). Thunderstorm Wind	wind speed (kt and mph)	189, 1956 to 2026	50 kt (58 mph) to 86 kt (99 mph) (median 52 kt (60 mph)); 148 with a recorded value	86 kt (99 mph), measurement type not recorded, Thunderstorm Wind, 1974-09-21	Thunderstorm Wind, 2012-06-29, \$13,300,000 property; \$0 crops (2012 dollars)	Event records naming member places: Hammonton town (21 records), Folsom borough (10 records), Port Republic city (6 records), Absecon city (5 records), Atlantic City city (4 records), Buena borough (4 records), Egg Harbor City city (3 records), Linwood city (3 records), Northfield city (3 records), Brigantine city (2 records); and 6 more member places (see the XLSX file).	
Tornado	Enhanced Fujita (F before Feb 2007)	9, 1970 to 2025	F/EF0 to F/EF2 (median F/EF1); 9 with a recorded value	F2 tornado, 1987-07-21, 0.5 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 100 yd wide, \$2,500 property; crops not recorded (1987 dollars), 3 direct injuries	Tornado, 1993-08-21, \$500,000 property; crops not recorded (1993 dollars)	Event records naming member places: Brigantine city (1 record), Folsom borough (1 record), Hammonton town (1 record).	From 1996 on, tornado records are per-county segments and length is the path length within this county (NWS Instruction 10-1605); records before 1996 may give the whole path length, including the path outside this county, and before 1996 a tornado is listed once, under the county where it began, with the whole path's rating; counties farther along the path may not list it. Length is not used to rank tornadoes.
Tsunami	none (count and damage)	1, 2013 to 2013 (1 zone-level)		No damage reported in 1 records.		Zone-level records: applies countywide; national data do not locate these events within the county.	Physical measure: in event narratives only; local data required.
Volcanic Ash, Volcanic Ashfall	Volcanic Explosivity Index (local data)	0					Physical measure: in event narratives only; local data required.
Wildfire	acres burned (local data)	9, 1997 to 2009 (5 zone-level)		No damage reported in 9 records.		Event records naming member places: Atlantic City city (1 record). Zone-level records (5) apply countywide.	Acres burned: in event narratives only; local data required.

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Winter Storm, Heavy Snow, Blizzard, Lake- Effect Snow, Winter Weather, Sleet	none in data (snowfall local)	192, 1996 to 2026 (192 zone-level)		Winter Storm, 2005-01-22, \$2,000,000 property; crops not reported, reported for the zone (2005 dollars); NWS zone NJZ022 (WESTERN ATLANTIC), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Snow depth: in event narratives only; local data required.

Where a hazard names more than 10 member places, the table lists the 10 with the most records; every place is in the XLSX file, sheet "B1-c Extent".

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Supports B1-e: probability

Probability: FEMA annualized frequency and descriptor per hazard

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area- weighted, so can be fractional)	NRI period	Location	Note
Avalanche		events per year					1994 to 2023 (30 years)	see B1-f	Not Applicable in NRI for this county; no descriptor.
Coastal Flooding	3.67	events per year at a location (modeled)	about 3.7 per year at a given location in the county	Highly likely	FEMA annualized frequency (modeled)	not shown	modeled	see B1-f	Descriptor from NRI: the rate at a location is 1 or more a year, so the county rate is at least that.
Cold Wave	0.778	event-days per year	about 0.778 days per year	Likely	event-days in 12 of 30 years, 1996 to 2025 (40%)	12.6	2005-11-12 to 2024-11-12 (19 years)	countywide	Frost/Freeze records are not counted in this descriptor: they record crop freezes, not cold waves.
Drought	8.96	event-days per year	about 8.96 days per year	Likely	event-days in 9 of 30 years, 1996 to 2025 (30%)	238	2000 to 2025 (25.25 years; D3 and D4 only)	countywide	NRI gives about 8.96 drought event-days a year here (its annualized frequency over 25.25 years; not its event count divided by the years), but Storm Events has a record in only 9 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.
Earthquake	0.00142	annual probability at a location	chance a given location in the county has at least minor- damage shaking in a year: 0.142%			not shown	modeled	see B1-f	Descriptor not assigned: the NRI value is the chance at a location in the county, not how often the hazard affects the county, and Storm Events does not record earthquakes.
Hail	1.37	events per year	about 1.37 per year	Highly likely	FEMA annualized frequency (modeled)	53.6 (modeled)	1986 to 2023 (38 years)	countywide	
Heat Wave	4.55	event-days per year	about 4.55 days per year	Likely	event-days in 19 of 30 years, 1996 to 2025 (63.3%)	61.9	2005-11-12 to 2024-11-12 (19 years)	countywide	
Hurricane	0.169	events per year	about 1 in 6 years	Likely	FEMA annualized frequency (modeled)	62	1851 to 2024 (Atlantic)	see B1-f	NRI counts hurricane and tropical storm tracks passing within storm-force wind range; federal declarations are counted separately in B1-d and need not match.

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area- weighted, so can be fractional)	NRI period	Location	Note

Inland Flooding	2.11	event-days per year	about 2.11 days per year	Likely	event-days in 20 of 30 years, 1996 to 2025 (66.7%)	59	1996 to 2023 (28 years)	see B1-f	
Landslide	0.0799	events per year (modeled)	about 1 in 13 years	Possible	FEMA annualized frequency (modeled)	not shown	modeled	see B1-f

FEMA annualized frequency (modeled) comes from the National Risk Index v1.20 (December 2025). It is not recorded events divided by years, and what it measures depends on the hazard. For most hazards it estimates how often the hazard affects this county each year: it counts events or event-days (drought, heat wave, cold wave, winter weather, ice storm and inland flooding are in days per year; lightning is the number of days per year with a recorded cloud-to-ground strike, from the NOAA Storm Prediction Center daily lightning climatology); it may count events in the surrounding area (hail, strong wind, tornado, hurricane and ice storm use a 49 km grid and buffers) and is averaged over the county's area; and some hazards use a minimum value for places with no recorded event. Earthquake, wildfire and coastal flooding are different: FEMA computes them for each census block and averages them over the county, so the value is the chance (for coastal flooding, the modeled number of floods per year) at a location in the county, which is lower than the chance that the hazard strikes somewhere in the county. Earthquake is the chance of at least minor-damage shaking (U.S. Geological Survey model); wildfire is the chance that a location

burns in a large fire (U.S. Forest Service burn probability); coastal flooding comes from FEMA flood zones and NOAA high-tide flooding, so it can be above 1 where high-tide flooding is frequent. Tsunami is the value at the county's most exposed location, from recorded events and modeled return periods. For these four hazards the packet gives no "1 in N years" and takes the descriptor from Storm Events (none for earthquake) unless the value is 1 or more a year. Landslide is a U.S. Geological Survey modeled county rate spread by slope susceptibility. Volcanic activity is the chance that a volcano affecting the county erupts in a year. Drought counts only extreme and exceptional drought (D3 and D4). Hail smaller than 1 inch is not counted: on 2010-01-05 the National Weather Service raised its severe-hail threshold from 3/4 inch to 1 inch, so smaller reports became less common after 2009 (NWS Service Change Notice 09-52). NRI hail frequency uses a 0.75 inch threshold.

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

FEMA does not split Public Assistance by hazard. A declaration mapped to several hazards is listed under each of them with its full amount, so the per-hazard column must not be added up; the unit total counts each declaration once.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Supports B2-a: context

County context

Measure	Value
Population	274,261
Building value (total, not at risk)	\$68,910,903,577
Agriculture value (total, not at risk)	\$155,369,625
NRI risk rating (all hazards)	Relatively Moderate
Expected annual loss, buildings and agriculture, all hazards	\$110,503,397
Expected annual loss, population equivalence, all hazards (NRI values each statistical life at \$13.7M; a modeled value of expected deaths and injuries, not property damage)	\$12,845,669
Social vulnerability rating	Relatively Moderate
Community resilience rating	Very High
NRI version	December 2025

FEMA's all-hazard expected annual loss total adds buildings, agriculture and population equivalence; the two parts are shown separately so the property figure is not read as including the statistical value of life.

Supports B2-c: repetitive loss

Repetitive loss in this county, both definitions

Definition	Properties	Severe repetitive loss	Properties
Repetitive loss, FMA definition (44 CFR 77.2)	24	Severe repetitive loss, FMA definition (44 CFR 77.2)	192
Repetitive loss, NFIP insurance definition	822	Severe repetitive loss, NFIP insurance definition	128

Your state NFIP coordinator's list may use the NFIP insurance definition, so its counts can be higher.

FMA RL and FMA SRL are the Flood Mitigation Assistance definitions (44 CFR 77.2), the ones the FEMA Local Mitigation Planning Policy Guide cites; OpenFEMA's fmaRI field description omits the Increased Cost of Compliance clause of 44 CFR 77.2(i). NFIP repetitive loss (FEMA insurance definition, nfipRI) is 2 or more claims over \$1,000 in 10 years and can drop to false when a property is mitigated. Also shown: NFIP severe repetitive loss, any category, mitigated and currently insured.

Your state NFIP coordinator's list may use the NFIP insurance definition, so its counts can be higher.
Counts are aggregates of FEMA's public NFIP Multiple Loss Properties file (as of 2026-08-02). No property is identified. County assignment is FEMA's geocode.
Counts may differ from your state NFIP coordinator's list, which is the source the Handbook names.
In this county 4 properties are FMA repetitive loss but not NFIP repetitive loss, and 802 properties are NFIP repetitive loss but not FMA repetitive loss.
Exact counts; no count suppression.
