Unit **County area 51083** Release **2026-10** As of **2026-09-28** Storm Events data through **2026-06-30**

Hazard Plain is an independent product built from public federal data. It is not a FEMA document and is not reviewed or endorsed by FEMA or any state agency.

A starting point for the plan's risk assessment (FEMA Local Mitigation Plan Review Tool, Element B). It does not replace local data or FEMA review. Section headings say which FEMA review item each table supports; whether an item is satisfied is decided by the plan and its reviewers.

OPENFEMA DISCLAIMER

This product uses the Federal Emergency Management Agency's OpenFEMA API, but is not endorsed by FEMA. The Federal Government or FEMA cannot vouch for the data or analyses derived from these data after the data have been retrieved from the Agency's website(s).

Avalanche	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Coastal Flood, Storm Surge/ Tide	none in data (FIRM for depth)	0					Flood depth: see the FEMA Flood Insurance Rate Map.

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Cold/Wind Chill, Extreme Cold/Wind Chill	wind chill	2, 1996 to 1996 (2 zone-level)	4 days to 5 days (median 4.5 days); 2 with a recorded value	5 consecutive days, 1996-03-08 to 1996-03-12, zone-level		Zone-level records: applies countywide; national data do not locate these events within the county. Drought	US Drought Monitor D-scale	25, 1998 to 2026 (25 zone-level)	20 days to 155 days (median 52 days); 10 with a recorded value	155 days (about 5.1 months), 2007-11-20 to 2008-04-22, a run of 6 consecutive Storm Events drought records, zone-level	Drought, 2007-09-01, \$0 property; \$10,000,000 crops, reported for the zone (2007 dollars)	Zone-level records: applies countywide; national data do not locate these events within the county.	Storm Events enters a drought at D2 or worse east of the Rockies and D3 or worse from the Rockies west (NWS Instruction 10-1605); NRI drought counts D3 and D4 only.
Earthquake	Modified Mercalli (local data)	0					No Storm Events record; local data required (e.g., USGS).
Hail	hail size (inches)	134, 1957 to 2023	0.75 in to 3 in (median 1 in); 134 with a recorded value	3 in hail, 2016-09-28; same size also recorded on 2002-05-02	Hail, 2002-05-02, \$350,000 property; crops not reported (2002 dollars)	Event records naming member places: Halifax town (17 records), South Boston town (11 records), Virgilina town (8 records), Scottsburg town (7 records).	
Excessive Heat, Heat	heat index (narratives)	1, 2012 to 2012 (1 zone-level)	2 days; 1 with a recorded value	2 consecutive days, 2012-06-29 to 2012-06-30, zone-level		Zone-level records: applies countywide; national data do not locate these events within the county.	Heat index: in event narratives only; local data required.
Hurricane, Tropical Storm, Tropical Depression	Saffir-Simpson	3, 2003 to 2020 (3 zone-level)		Strongest recorded (records with damage, a wind speed or direct casualties first, then storm type, category and wind): Tropical Storm record, 2020-10-29, \$10,000 property; \$0 crops, reported for the zone (2020 dollars); NWS zone VAZ058 (HALIFAX), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Storm Events files every zone of a storm's episode under the storm's event type and category, so a Hurricane (Typhoon) record, especially an inland or remnant one, does not by itself mean hurricane-force winds here; read the damage and wind columns.
Ice Storm	Sperry-Piltz (local data)	2, 1996 to 1998 (2 zone-level)		Ice Storm, 1996-02-02, \$150,000 property; crops not reported, reported for the zone (1996 dollars); NWS zone VAZ058 (HALIFAX), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Ice thickness: in event narratives only; local data required.

Flash Flood, Flood, Lakeshore Flood	damage and flood days (FIRM for depth)	174, 1996 to 2026 (60 zone-level)		Flood, 1996-09-03, \$6,000,000 property; \$4,200,000 crops, reported for the zone (1996 dollars); NWS zone VAZ058 (HALIFAX), zone-level: may include parts of neighboring counties		Event records naming member places: South Boston town (46 records), Scottsburg town (4 records), Virgilina town (4 records), Halifax town (3 records). Zone-level records (60) apply countywide.	Flood depth: see the FEMA Flood Insurance Rate Map. Storm Events damage can be \$0 or blank even for a major flood, so the worst record here may not be the worst flood; compare FEMA Public Assistance by declaration in B1-d.
Debris Flow	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Lightning	annualized frequency (the measure FEMA's Local Mitigation Planning Handbook names)	17, 1996 to 2023		Lightning, 2007-06-05, \$98,000 property; \$0 crops (2007 dollars)		Event records naming member places: South Boston town (5 records), Halifax town (3 records), Scottsburg town (1 record).	Storm Events lists lightning with damage or casualties; physical measure in event narratives only; local data required.
High Wind and Strong Wind (outside NRI Strong Wind definition)	wind speed (kt and mph)	23, 1996 to 2026 (23 zone-level)	26 kt (30 mph) to 60 kt (69 mph) (median 50 kt (58 mph)); 19 with a recorded value	60 kt (69 mph) estimated gust, High Wind, 2025-02-16; same speed and measurement basis also recorded on 2003-02-22, 2004-03-07; NWS zone VAZ058 (HALIFAX), zone-level: may include parts of neighboring counties	High Wind, 1996-09-05, \$700,000 property; \$30,000 crops, reported for the zone (1996 dollars)	Zone-level records: applies countywide; national data do not locate these events within the county.	
Thunderstorm Wind	wind speed (kt and mph)	467, 1955 to 2026	35 kt (40 mph) to 100 kt (115 mph) (median 50 kt (58 mph)); 400 with a recorded value	100 kt (115 mph) estimated gust, Thunderstorm Wind, 2021-10-25	Thunderstorm Wind, 2003-05-09, \$300,000 property; crops not reported (2003 dollars)	Event records naming member places: South Boston town (51 records), Halifax town (45 records), Scottsburg town (25 records), Virgilina town (16 records).	

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	How it applies to members	Note
Tornado	Enhanced Fujita (F before Feb 2007)	17, 1954 to 2024	F/EF0 to F/EF3 (median F/EF1); 17 with a recorded value	F3 tornado, 1969-03-24, 0.1 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 20 yd wide, \$25,000 property; crops not recorded (1969 dollars), 1 direct death, 4 direct injuries	Tornado, 2011-04-16, \$700,000 property; \$0 crops (2011 dollars)	Event records naming member places: Halifax town (1 record), Scottsburg town (1 record), Virgilina town (1 record).	From 1996 on, tornado records are per-county segments and length is the path length within this county (NWS Instruction 10-1605); records before 1996 may give the whole path length, including the path outside this county, and before 1996 a tornado is listed once, under the county where it began, with the whole path's rating; counties farther along the path may not list it. Length is not used to rank tornadoes.
Tsunami	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Volcanic Ash, Volcanic Ashfall	Volcanic Explosivity Index (local data)	0					Physical measure: in event narratives only; local data required.
Wildfire	acres burned (local data)	0					Acres burned: in event narratives only; local data required.
Winter Storm, Heavy Snow, Blizzard, Lake-Effect Snow, Winter Weather, Sleet	none in data (snowfall local)	41, 1996 to 2026 (41 zone-level)		Winter Storm, 2014-02-12, \$40,000 property; \$0 crops, reported for the zone (2014 dollars); NWS zone VAZ058 (HALIFAX), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Snow depth: in event narratives only; local data required.

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

Probability: FEMA annualized frequency and descriptor per hazard

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area- weighted, so can be fractional)	NRI period	Location	Note
Avalanche		events per year					1994 to 2023 (30 years)	see B1-f	Not Applicable in NRI for this county; no descriptor.
Coastal Flooding		events per year at a location (modeled)				not shown	modeled	see B1-f	Not Applicable in NRI for this county; no descriptor.
Cold Wave	0.632	event-days per year	about 0.632 days per year	Possible	event-days in 1 of 30 years, 1996 to 2025 (3.33%)	12	2005-11-12 to 2024-11-12 (19 years)	countywide	Frost/Freeze records are not counted in this descriptor: they record crop freezes, not cold waves.
Drought	10.4	event-days per year	about 10.4 days per year	Likely	event-days in 8 of 30 years, 1996 to 2025 (26.7%)	329	2000 to 2025 (25.25 years; D3 and D4 only)	countywide	NRI gives about 10.4 drought event-days a year here (its annualized frequency over 25.25 years; not its event count divided by the years), but Storm Events has a record in only 8 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.
Earthquake	0.00125	annual probability at a location	chance a given location in the county has at least minor- damage shaking in a year: 0.125%			not shown	modeled	see B1-f	Descriptor not assigned: the NRI value is the chance at a location in the county, not how often the hazard affects the county, and Storm Events does not record earthquakes.
Hail	3.96	events per year	about 3.96 per year	Highly likely	FEMA annualized frequency (modeled)	150.3 (modeled)	1986 to 2023 (38 years)	countywide	
Heat Wave	2.37	event-days per year	about 2.37 days per year	Possible	event-days in 1 of 30 years, 1996 to 2025 (3.33%)	36	2005-11-12 to 2024-11-12 (19 years)	countywide	NRI gives about 2.37 heat wave event-days a year here (its annualized frequency over 19 years; not its event count divided by the years), but Storm Events has a record in only 1 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.
Hurricane	0.0758	events per year	about 1 in 13 years	Possible	FEMA annualized frequency (modeled)	28	1851 to 2024 (Atlantic)	see B1-f	NRI counts hurricane and tropical storm tracks passing within storm-force wind range; federal declarations are counted separately in B1-d and need not match.

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area- weighted, so can be fractional)	NRI period	Location	Note

NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together.

Landslide	0.801	events per year (modeled)	about 0.8 per year	Likely	FEMA annualized frequency (modeled)	not shown	modeled	see B1-f

Strong Wind	2.47	events per year	about 2.47 per year	Highly likely	FEMA annualized frequency (modeled)	94	1986 to 2023 (38 years)	countywide	
Tornado	0.257	events per year	about 1 in 4 years	Likely	FEMA annualized frequency (modeled)	not shown	1950 to 2023 (EF2+); 1986 to 2023 (EF0-1)	see B1-f

Winter Weather	6.47	event-days per year	about 6.47 days per year	Likely	event-days in 19 of 30 years, 1996 to 2025 (63.3%)	123	2005-11-12 to 2024-11-12 (19 years)	countywide	

FEMA annualized frequency (modeled) comes from the National Risk Index v1.20 (December 2025). It is not recorded events divided by years, and what it measures depends on the hazard. For most hazards it estimates how often the hazard affects this county each year: it counts events or event-days (drought, heat wave, cold wave, winter weather, ice storm and inland flooding are in days per year; lightning is the number of days per year with a recorded cloud-to-ground strike, from the NOAA Storm Prediction Center daily lightning climatology); it may count events in the surrounding area (hail, strong wind, tornado,

hurricane and ice storm use a 49 km grid and buffers) and is averaged over the county's area; and some hazards use a minimum value for places with no recorded event. Earthquake, wildfire and coastal flooding are different: FEMA computes them for each census block and averages them over the county, so the value is the chance (for coastal flooding, the modeled number of floods per year) at a location in the county, which is lower than the chance that the hazard strikes somewhere in the county. Earthquake is the chance of at least minor-damage shaking (U.S. Geological Survey model); wildfire is the chance that a location burns in a large fire (U.S. Forest Service burn probability); coastal flooding comes from FEMA flood zones and NOAA high-tide flooding, so it can be above 1 where high-tide flooding is frequent. Tsunami is the value at the county's most exposed location, from recorded events and modeled return periods. For these four hazards the packet gives no "1 in N years" and takes the descriptor from Storm Events (none for earthquake) unless the value is 1 or more a year. Landslide is a U.S. Geological Survey modeled county rate spread by slope susceptibility. Volcanic activity is the chance that a volcano affecting the county erupts in a year. Drought counts only extreme and exceptional drought (D3 and D4). Hail smaller than 1 inch is not counted: on 2010-01-05 the National Weather Service raised its severe-hail threshold from 3/4 inch to 1 inch, so smaller reports became less common after 2009 (NWS Service Change Notice 09-52). NRI hail frequency uses a 0.75 inch threshold.

Member rows are whole NFIP communities and need not add up to the county total: a community that extends into another county is counted in full on each member row, while the county table counts only its part in this county.

School districts and special districts get a plan clock row only.

Supports B2-a and B2-b: assets and impacts

Local data required

County-level starter. The plan must describe impacts for each participant and its own assets.

- Critical facilities and lifelines per hazard
- A problem statement per participant per hazard
- Changes in development in hazard-prone areas since the last approval, or a statement of none (E1-a)
- Future assets

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

FEMA does not split Public Assistance by hazard. A declaration mapped to several hazards is listed under each of them with its full amount, so the per-hazard column must not be added up; the unit total counts each declaration once.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Population	34,002
Building value (total, not at risk)	\$7,659,828,426

Measure	Value
Agriculture value (total, not at risk)	\$41,042,539
NRI risk rating (all hazards)	Relatively Low
Expected annual loss, buildings and agriculture, all hazards	\$7,458,033
Expected annual loss, population equivalence, all hazards (NRI values each statistical life at \$13.7M; a modeled value of expected deaths and injuries, not property damage)	\$1,485,758
Social vulnerability rating	Very High
Community resilience rating	Relatively Low
NRI version	December 2025

FEMA's all-hazard expected annual loss total adds buildings, agriculture and population equivalence; the two parts are shown separately so the property figure is not read as including the statistical value of life.

FMA RL and FMA SRL are the Flood Mitigation Assistance definitions (44 CFR 77.2), the ones the FEMA Local Mitigation Planning Policy Guide cites; OpenFEMA's fmaRl field description omits the Increased Cost of Compliance clause of 44 CFR 77.2(i). NFIP repetitive loss (FEMA insurance definition, nfipRl) is 2 or more claims over \$1,000 in 10 years and can drop to false when a property is mitigated. Also shown: NFIP severe repetitive loss, any category, mitigated and currently insured.

Your state NFIP coordinator's list may use the NFIP insurance definition, so its counts can be higher.

Counts are aggregates of FEMA's public NFIP Multiple Loss Properties file (as of 2026-08-02). No property is identified. County assignment is FEMA's geocode.

Counts may differ from your state NFIP coordinator's list, which is the source the Handbook names.

In this county 0 properties are FMA repetitive loss but not NFIP repetitive loss, and 21 properties are NFIP repetitive loss but not FMA repetitive loss.

Exact counts; no count suppression.
