

Hyde Park town, VT

Risk-assessment baseline packet (county-level sections from Lamoille County)

Unit **Vermont town 5001535050** Release **2026-10** As of **2026-09-28** Storm Events data through **2026-06-30**

Hazard Plain is an independent product built from public federal data. It is not a FEMA document and is not reviewed or endorsed by FEMA or any state agency.

A starting point for the plan's risk assessment (FEMA Local Mitigation Plan Review Tool, Element B). It does not replace local data or FEMA review. Section headings say which FEMA review item each table supports; whether an item is satisfied is decided by the plan and its reviewers.

OPENFEMA DISCLAIMER

This product uses the Federal Emergency Management Agency's OpenFEMA API, but is not endorsed by FEMA. The Federal Government or FEMA cannot vouch for the data or analyses derived from these data after the data have been retrieved from the Agency's website(s).

Plan clock

Status	Approved, expires 2031-08-31	Plan	Town of Hyde Park and Village of Hyde Park, Vermont Local Hazard Mitigation Plan (FEMA plan 112246)
Approved	2026-09-01	Expires	2031-08-31
As of	2026-09-28	Days	1,798 days to expiry

What changed since your last plan (approved 2026-09-01)

New federal declarations	none (0 declaration rows; 0 counted incidents)	Storm Events records since approval (Lamoille County, county-level)	not yet covered: Storm Events data run through 2026-06-30, before the approval date, so there is no period to count yet
Repetitive loss now (this town)	FMA RL 0, SRL 0 (44 CFR 77.2); any definition: 1	Repetitive loss scope	This town's NFIP community only. The other participants of the town's plan (Hyde Park village) are not counted here; the B2-c county table lists a community only when FEMA's multiple-loss file has properties for it.
Repeat-flood change	First release: no prior release to compare.

Supports B1-a: hazards

Inherited from Lamoille County, county-level (county FIPS 50015); scope: whole section.

Hazards NRI does not cover: check locally

- dam failure (incl. upstream dams)
 - levee failure
 - flash flood as its own subtype
 - ice jams
- debris flows
 - erosion (riverine and coastal)
 - land subsidence and sinkholes
 - expansive soils

The 18 National Risk Index hazards, ranked by expected annual loss (EAL)

Rank by EAL	Hazard	NRI risk rating	EAL rating	EAL buildings modeled dollars per year	EAL agriculture modeled dollars per year	EAL population equivalence statistical value of life and injury, \$13.7M per life, not property damage	EAL total (see note) modeled dollars per year	Storm Events records since 1996 count	Evidence for an omission NRI Not Applicable, no declaration and no Storm Events record since 1996	Storm Events coverage note
1	Inland Flooding	Relatively Low	Relatively Low	\$8,173,199	\$37,034	\$59,291	\$8,269,524	60		
2	Cold Wave	Relatively Low	Relatively Low	\$269	\$14,671	\$547,993	\$562,932	29		Includes 3 Frost/Freeze records, event types the NRI definition of this hazard leaves out.
3	Hurricane	Relatively Low	Relatively Low	\$347,868	\$21,601	\$7,320	\$376,789	0		Declared 4 times; no Storm Events record of this type.
4	Winter Weather	Relatively Moderate	Relatively High	\$99,497	\$62	\$207,030	\$306,589	325		
5	Lightning	Relatively Low	Relatively Low	\$34,251		\$210,354	\$244,605	2		
6	Strong Wind	Relatively Low	Relatively Low	\$124,212	\$1,939	\$117,528	\$243,679	144		Includes 32 High Wind records and 39 Strong Wind records, event types the NRI definition of this hazard leaves out.
7	Earthquake	Very Low	Very Low	\$224,206		\$19,384	\$243,590			Not in Storm Events. Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
8	Heat Wave	Very Low	Very Low	under \$1	\$37,686	\$71,987	\$109,673	5		
9	Tornado	Very Low	Very Low	\$21,784	\$103	\$77,542	\$99,429	2		

Rank by EAL	Hazard	NRI risk rating	EAL rating	EAL buildings <i>modeled dollars per year</i>	EAL agriculture <i>modeled dollars per year</i>	EAL population equivalence <i>statistical value of life and injury, \$13.7M per life, not property damage</i>	EAL total (see note) <i>modeled dollars per year</i>	Storm Events records since 1996 <i>count</i>	Evidence for an omission <i>NRI Not Applicable, no declaration and no Storm Events record since 1996</i>	Storm Events coverage note
10	Ice Storm	Relatively Low	Relatively Low	\$73,915		\$6,886	\$80,801	1		
11	Hail	Very Low	Very Low	\$2,533	\$2,773	\$12,009	\$17,315	27		
12	Landslide	Relatively Low	Relatively Low	\$6,844		\$7,030	\$13,873	0		Declared 3 times; no Storm Events record of this type. Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
13	Wildfire	Very Low	Very Low	\$6,839	\$2	\$429	\$7,270	0		No recorded events in Storm Events since 1996 (data through 2026-06-30). Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
14	Avalanche	Very Low	Very Low	under \$1		\$1,547	\$1,547	0		No recorded events in Storm Events since 1996 (data through 2026-06-30).
15	Drought	No Rating	No Expected Annual Losses		\$0		\$0	0		No recorded events in Storm Events since 1996 (data through 2026-06-30).
	Coastal Flooding	Not Applicable	Not Applicable					0	NRI rates coastal flooding Not Applicable for this county, and no federal declaration for this county names it.	No recorded events in Storm Events since 1996 (data through 2026-06-30).
	Tsunami	Not Applicable	Not Applicable					0	NRI rates tsunami Not Applicable for this county, and no federal declaration for this county names it.	No recorded events in Storm Events since 1996 (data through 2026-06-30). Storm Events coverage of this hazard is limited; absence is not evidence of low risk.
	Volcanic Activity	Not Applicable	Not Applicable					0	NRI rates volcanic activity Not Applicable for this county, and no federal declaration for this county names it.	No recorded events in Storm Events since 1996 (data through 2026-06-30). Storm Events coverage of this hazard is limited; absence is not evidence of low risk.

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

Check your state hazard mitigation plan's hazard list for this county; explain any hazard you drop.

Supports B1-b: location

Inherited from Lamoille County, county-level (county FIPS 50015); scope: whole section.

Where each hazard occurs

Hazard	Location	Census tracts rated <i>rated of all tracts</i>
Avalanche	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	6 of 7
Coastal Flooding	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	0 of 7
Cold Wave	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7
Drought	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	0 of 7
Earthquake	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	7 of 7
Hail	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7
Heat Wave	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7
Hurricane	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	7 of 7
Ice Storm	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7
Inland Flooding	The FEMA Flood Insurance Rate Map (FIRM) is the required location source for flooding. See the FEMA Flood Map Service Center (https://msc.fema.gov) for this county.	7 of 7
Landslide	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	7 of 7
Lightning	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7
Strong Wind	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7
Tornado	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	7 of 7
Tsunami	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	0 of 7
Volcanic Activity	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	0 of 7
Wildfire	Census tract rating counts from the National Risk Index tract table (see B1-f). Tract maps and place names are not in this packet.	7 of 7
Winter Weather	Affects the whole planning area; national data do not distinguish locations within the county. Confirm locally.	7 of 7

Supports B1-c: extent

Inherited from Lamoille County, county-level (county FIPS 50015); scope: whole section.

Extent: scale, observed range and worst recorded event per hazard

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	Where in the county	Note
Avalanche	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Coastal Flood, Storm Surge/ Tide	none in data (FIRM for depth)	0					Flood depth: see the FEMA Flood Insurance Rate Map.

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	Where in the county	Note
Cold/Wind Chill, Extreme Cold/Wind Chill	wind chill	26, 1997 to 2026 (26 zone-level)	1 day to 28 days (median 2 days); 25 with a recorded value	28 days, 2015-02-01 to 2015-02-28, from 1 monthly summary record (a monthly summary record covers most or all of a month; it does not count days at wave conditions), zone-level		Zone-level records: applies countywide; national data do not locate these events within the county.	Wind chill: in event narratives only; local data required.
Frost/Freeze (outside NRI Cold Wave definition)	crop damage	3, 2005 to 2023 (3 zone-level)		Frost/Freeze, 2023-05-18, \$250,000 crop damage, reported for the zone (2023 dollars); NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Temperature: in event narratives only; local data required.
Drought	US Drought Monitor D-scale	0					Storm Events enters a drought at D2 or worse east of the Rockies and D3 or worse from the Rockies west (NWS Instruction 10-1605); NRI drought counts D3 and D4 only.
Earthquake	Modified Mercalli (local data)	0					No Storm Events record; local data required (e.g., USGS).
Hail	hail size (inches)	31, 1972 to 2025	0.75 in to 1.75 in (median 0.88 in); 31 with a recorded value	1.75 in hail, 2025-05-17	Hail, 2010-07-21, \$25,000 property; \$0 crops (2010 dollars)	Event records naming places in the county (county page list): Stowe town (7 records), Cambridge town (5 records), Jeffersonville village (5 records), Johnson town (4 records), Johnson village (3 records), Waterville town (2 records), Eden town (1 record), Hyde Park town (1 record), Hyde Park village (1 record).	
Excessive Heat, Heat	heat index (narratives)	5, 2006 to 2025 (5 zone-level)	1 day to 6 days (median 1.5 days); 4 with a recorded value	6 consecutive days, 2018-07-01 to 2018-07-06, zone-level	Heat, 2012-03-17, \$0 property; \$750,000 crops, reported for the zone (2012 dollars)	Zone-level records: applies countywide; national data do not locate these events within the county.	Heat index: in event narratives only; local data required. Heat records from November to March (unseasonable warmth, not a heat wave) are counted but not used for the longest run.

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	Where in the county	Note
Hurricane, Tropical Storm, Tropical Depression	Saffir-Simpson	0					Storm Events files every zone of a storm's episode under the storm's event type and category, so a Hurricane (Typhoon) record, especially an inland or remnant one, does not by itself mean hurricane-force winds here; read the damage and wind columns.
Ice Storm	Sperry-Piltz (local data)	1, 2013 to 2013 (1 zone- level)		Ice Storm, 2013-12-21, \$750,000 property; \$0 crops, reported for the zone (2013 dollars); NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Ice thickness: in event narratives only; local data required.
Flash Flood, Flood, Lakeshore Flood	damage and flood days (FIRM for depth)	60, 1996 to 2026 (10 zone- level)		Flood, 2011-08-28, \$2,500,000 property; \$1,000,000 crops (2011 dollars)		Event records naming places in the county (county page list): Cambridge town (8 records), Stowe town (8 records), Cambridge village (7 records), Eden town (7 records), Johnson town (6 records), Johnson village (5 records), Wolcott town (5 records), Hyde Park town (4 records), Belvidere town (3 records), Elmore town (2 records); and 3 more places (see the XLSX file). Zone-level records (10) apply countywide.	Flood depth: see the FEMA Flood Insurance Rate Map. Storm Events damage can be \$0 or blank even for a major flood, so the worst record here may not be the worst flood; compare FEMA Public Assistance by declaration in B1-d.
Debris Flow	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Lightning	annualized frequency (the measure FEMA's Local Mitigation Planning Handbook names)	2, 2011 to 2012		Lightning, 2011-05-20, \$100,000 property; \$0 crops (2011 dollars)		Event records naming places in the county (county page list): Cambridge town (1 record), Jeffersonville village (1 record), Stowe town (1 record).	Storm Events lists lightning with damage or casualties; physical measure in event narratives only; local data required.
High Wind and Strong Wind (outside NRI Strong Wind definition)	wind speed (kt and mph)	71, 1996 to 2026 (70 zone- level)	30 kt (35 mph) to 83 kt (96 mph) (median 43.5 kt (50 mph)); 66 with a recorded value	83 kt (96 mph), measurement type not recorded, High Wind, 1996-01-27; NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties	High Wind, 2010-12-01, \$750,000 property; \$0 crops, reported for the zone (2010 dollars)	No event record names a listed place in the county. Zone- level records (70) apply countywide.	

Hazard	Scale	Records <i>count, years</i>	Observed range	Worst recorded event	Most damaging (when different)	Where in the county	Note
Thunderstorm Wind	wind speed (kt and mph)	84, 1975 to 2025	50 kt (58 mph) to 65 kt (75 mph) (median 50 kt (58 mph)); 61 with a recorded value	65 kt (75 mph) estimated gust, Thunderstorm Wind, 2013-07-19; same speed and measurement basis also recorded on 2008-07-18, 2011-05-26	Thunderstorm Wind, 2008-07-18, \$150,000 property; \$0 crops (2008 dollars)	Event records naming places in the county (county page list): Cambridge town (15 records), Stowe town (12 records), Johnson town (11 records), Cambridge village (9 records), Johnson village (9 records), Hyde Park town (7 records), Eden town (5 records), Hyde Park village (5 records), Jeffersonville village (5 records), Morristown town (5 records); and 4 more places (see the XLSX file).	
Tornado	Enhanced Fujita (F before Feb 2007)	3, 1960 to 2008	F/EF0 to F/EF2 (median F/EF1); 3 with a recorded value	F2 tornado, 1960-06-24, 2 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 100 yd wide, \$25,000 property; crops not recorded (1960 dollars)	Tornado, 2008-07-18, \$100,000 property; \$0 crops (2008 dollars)	Event records naming places in the county (county page list): Cambridge town (2 records).	From 1996 on, tornado records are per-county segments and length is the path length within this county (NWS Instruction 10-1605); records before 1996 may give the whole path length, including the path outside this county, and before 1996 a tornado is listed once, under the county where it began, with the whole path's rating; counties farther along the path may not list it. Length is not used to rank tornadoes.
Tsunami	none (count and damage)	0					Physical measure: in event narratives only; local data required.
Volcanic Ash, Volcanic Ashfall	Volcanic Explosivity Index (local data)	0					Physical measure: in event narratives only; local data required.
Wildfire	acres burned (local data)	0					Acres burned: in event narratives only; local data required.
Winter Storm, Heavy Snow, Blizzard, Lake-Effect Snow, Winter Weather, Sleet	none in data (snowfall local)	325, 1996 to 2026 (325 zone-level)		Heavy Snow, 2007-02-14, \$200,000 property; \$0 crops, reported for the zone (2007 dollars); NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		Zone-level records: applies countywide; national data do not locate these events within the county.	Snow depth: in event narratives only; local data required.

Where a hazard names more than 10 member places, the table lists the 10 with the most records; every place is in the XLSX file, sheet "B1-c Extent".

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

County Public Assistance: applicants the FEMA record places in this county, including any state agencies FEMA files there; statewide rows are listed on the state page; federal share obligated, nominal dollars. Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

The County Public Assistance column is the whole county's, including any state agencies FEMA files there; this town's own matched Public Assistance is in the per-member block (B1-f).

Notable Storm Events records

Date	Event type	Magnitude or extent	Damage <i>nominal dollars</i>	Direct deaths, injuries <i>indirect not counted</i>	Location	Flags	Why listed
2023-05-18	Frost/Freeze		\$0 property; \$250,000 crops, reported for the zone (2023 dollars)	0, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties	within last 5 years	B1-c worst recorded: Frost/Freeze (outside NRI Cold Wave definition)
2018-07-01	Heat		\$0 property; \$0 crops, reported for the zone (2018 dollars)	0, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		B1-c worst recorded: Excessive Heat, Heat
2015-02-01	Cold/Wind Chill		\$0 property; \$0 crops, reported for the zone (2015 dollars)	0, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		B1-c worst recorded: Cold/Wind Chill, Extreme Cold/Wind Chill
2013-12-21	Ice Storm		\$750,000 property; \$0 crops, reported for the zone (2013 dollars)	0, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		B1-c worst recorded: Ice Storm
2013-07-19	Thunderstorm Wind	65 kt (75 mph) estimated gust	\$50,000 property; \$0 crops (2013 dollars)	0, 0	STOWE FORK		B1-c worst recorded: Thunderstorm Wind
2011-08-28	Flood		\$2,500,000 property; \$1,000,000 crops (2011 dollars)	0, 0	MOSCOW to CAMBRIDGE		B1-c worst recorded: Flash Flood, Flood, Lakeshore Flood
2011-05-20	Lightning		\$100,000 property; \$0 crops (2011 dollars)	0, 0	STOWE		B1-c worst recorded: Lightning
2007-02-14	Heavy Snow		\$200,000 property; \$0 crops, reported for the zone (2007 dollars)	0, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		B1-c worst recorded: Winter Storm, Heavy Snow, Blizzard, Lake-Effect Snow, Winter Weather, Sleet
2004-03-21	Winter Weather		\$20,000 property; crops not reported, reported for the zone (2004 dollars)	1, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		deaths or injuries recorded
1996-01-27	High Wind	83 kt (96 mph), measurement type not recorded	\$50,000 property; crops not reported, reported for the zone (1996 dollars)	0, 0	NWS zone VTZ006 (LAMOILLE), zone-level: may include parts of neighboring counties		B1-c worst recorded: High Wind and Strong Wind (outside NRI Strong Wind definition)
1993-08-31	Thunderstorm Wind	speed not recorded	\$5,000 property; crops not recorded (1993 dollars)	0, 3	Stowe		deaths or injuries recorded
1960-06-24	Tornado	F2, 2 mi path length (records before 1996 may include the whole path; rating and listing come from the county where the tornado began), 100 yd wide	\$25,000 property; crops not recorded (1960 dollars)	0, 0	location not recorded		B1-c worst recorded: Tornado

The full list is in the XLSX file, sheet "B1-d Storm Events history" (611 rows).

Storm Events records are more complete after 1996; before 1996 only Tornado (from 1950), Hail and Thunderstorm Wind (from 1955) exist. Zone-level records are placed with NWS zone-county files, which exist from 2020 on; an earlier record is placed by its zone number in the nearest later file only when its zone name matches that file, records from zones NWS renumbered are placed by name or left out, and a record whose zone is in no known file is left out of every count, so counts before 2020 can be low. Some current zones are also missing from the NWS files, so recent counts can be low too.

State-declared emergencies are not in federal data. Add them from your state emergency management agency.

FEMA's declaration data list no tribal or special-area declarations for this state.

Supports B1-e: probability

Inherited from Lamoille County, county-level (county FIPS 50015); scope: whole section.

Probability: FEMA annualized frequency and descriptor per hazard

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area-weighted, so can be fractional)	NRI period	Location	Note
Avalanche	0.01	events per year	about 1 in 100 years	Possible	FEMA annualized frequency (modeled)	0	1994 to 2023 (30 years)	see B1-f	0.01 is NRI's minimum avalanche frequency for a county in an avalanche susceptibility zone; NRI records no avalanche here, so the descriptor reflects the floor, not local events.
Coastal Flooding		events per year at a location (modeled)				not shown	modeled	see B1-f	Not Applicable in NRI for this county; no descriptor.
Cold Wave	4.78	event-days per year	about 4.78 days per year	Likely	event-days in 11 of 30 years, 1996 to 2025 (36.7%)	90.7	2005-11-12 to 2024-11-12 (19 years)	countywide	NRI gives about 4.78 cold wave event-days a year here (its annualized frequency over 19 years; not its event count divided by the years), but Storm Events has a record in only 11 of 30 years. NRI counts from a different source that records far more events than Storm Events, so this descriptor reads much lower than NRI's frequency; read the two together. Frost/Freeze records are not counted in this descriptor: they record crop freezes, not cold waves.
Drought	0	event-days per year	none modeled		event-days in 0 of 30 years, 1996 to 2025 (0%)	0	2000 to 2025 (25.25 years; D3 and D4 only)	countywide	No recorded event-days, 1996 to 2025; descriptor not assigned
Earthquake	0.00152	annual probability at a location	chance a given location in the county has at least minor- damage shaking in a year: 0.152%			not shown	modeled	see B1-f	Descriptor not assigned: the NRI value is the chance at a location in the county, not how often the hazard affects the county, and Storm Events does not record earthquakes.
Hail	1.14	events per year	about 1.14 per year	Highly likely	FEMA annualized frequency (modeled)	43.5 (modeled)	1986 to 2023 (38 years)	countywide	
Heat Wave	0.691	event-days per year	about 0.691 days per year	Likely	event-days in 5 of 30 years, 1996 to 2025 (16.7%)	13.1	2005-11-12 to 2024-11-12 (19 years)	countywide	

Hazard	FEMA annualized frequency (modeled) <i>unit per row</i>	Unit	In plain terms	Descriptor	Descriptor basis	NRI events or days in its record period (hail, wind and tornado are area-weighted, so can be fractional)	NRI period	Location	Note
Hurricane	0.0284	events per year	about 1 in 35 years	Possible	FEMA annualized frequency (modeled)	8	1851 to 2024 (Atlantic)	see B1-f	NRI counts hurricane and tropical storm tracks passing within storm-force wind range; federal declarations are counted separately in B1-d and need not match.
Ice Storm	0.243	event-days per year	about 0.243 days per year	Possible	event-days in 1 of 30 years, 1996 to 2025 (3.33%)	17	1946-12-31 to 2014-02-12 (67 years)	countywide	
Inland Flooding	1.61	event-days per year	about 1.61 days per year	Likely	event-days in 24 of 30 years, 1996 to 2025 (80%)	45	1996 to 2023 (28 years)	see B1-f	
Landslide	0.933	events per year (modeled)	about 0.93 per year	Likely	FEMA annualized frequency (modeled)	not shown	modeled	see B1-f	
Lightning	23	days per year with a strike	about 23 days per year	Highly likely	FEMA annualized frequency (modeled)	not shown	1995 to 2023 (29 years; CONUS)	countywide	
Strong Wind	0.749	events per year	about 0.75 per year	Likely	FEMA annualized frequency (modeled)	29	1986 to 2023 (38 years)	countywide	
Tornado	0.0225	events per year	about 1 in 44 years	Possible	FEMA annualized frequency (modeled)	not shown	1950 to 2023 (EF2+); 1986 to 2023 (EF0-1)	see B1-f	
Tsunami		annual probability at the most exposed location (used in place of a county value)				not shown	modeled	see B1-f	Not Applicable in NRI for this county; no descriptor.
Volcanic Activity		annual probability				not shown	modeled	see B1-f	Not Applicable in NRI for this county; no descriptor.
Wildfire	0.000013	annual probability at a location	chance a given location in the county burns in a year: 0.0013%		Storm Events records in 0 of 30 years, 1996 to 2025 (0%)	not shown	modeled	see B1-f	No Storm Events record of this hazard, 1996 to 2025; descriptor not assigned (the NRI value is the chance at a location in the county, not how often the hazard affects the county)
Winter Weather	22.8	event-days per year	about 22.8 days per year	Highly likely	event-days in 30 of 30 years, 1996 to 2025 (100%)	433	2005-11-12 to 2024-11-12 (19 years)	countywide	

FEMA annualized frequency (modeled) comes from the National Risk Index v1.20 (December 2025). It is not recorded events divided by years, and what it measures depends on the hazard. For most hazards it estimates how often the hazard affects this county each year: it counts events or event-days (drought, heat wave, cold wave, winter weather, ice storm and inland flooding are in days per year; lightning is the number of days per year with a recorded cloud-to-ground strike, from the NOAA Storm Prediction Center daily lightning climatology); it may count events in the surrounding area (hail, strong wind, tornado, hurricane and ice storm use a 49 km grid and buffers) and is averaged over the county's area; and some hazards use a minimum value for places with no recorded event. Earthquake, wildfire and coastal flooding are different: FEMA computes them for each census block and averages them over the county, so the value is the chance (for coastal flooding, the modeled number of floods per year) at a location in the county, which is lower than the chance that the hazard strikes somewhere in the county. Earthquake is the chance of at least minor-damage shaking (U.S. Geological Survey model); wildfire is the chance that a location burns in a large fire (U.S. Forest Service burn probability); coastal flooding comes from FEMA flood zones and NOAA high-tide flooding, so it can be above 1 where high-tide flooding is frequent. Tsunami is the value at the county's most exposed location, from recorded events and modeled return periods. For these four hazards the packet gives no "1 in N years" and takes the descriptor from Storm Events (none for earthquake) unless the value is 1 or more a year. Landslide is a U.S. Geological Survey modeled county rate spread by slope susceptibility. Volcanic activity is the chance that a volcano affecting the county erupts in a year. Drought counts only extreme and exceptional drought (D3 and D4). Source: FEMA, National Risk Index Technical Documentation v1.20, sections 5.2.2 (Table 5), 5.2.3, 7.4, 10.4, 16.5, 17.1, 17.3.1, 17.5, 20.3.1, 21.4, 22.4 and 6 to 23.

Descriptor scale used in this packet (defined per unit)

Unit	Descriptor	Definition
events per year	Highly likely	1 or more per year
events per year	Likely	about once in 1 to 10 years
events per year	Possible	about once in 10 to 100 years
events per year	Unlikely	less than once in 100 years
annual probability	Likely	10% to under 100% chance in a given year
annual probability	Possible	1% to under 10% chance in a given year
annual probability	Unlikely	under 1% chance in a given year
event-days (share of years)	Highly likely	event-days recorded in 90% or more of years
event-days (share of years)	Likely	event-days recorded in 10% to under 90% of years
event-days (share of years)	Possible	event-days recorded in some years but under 10% of years
lightning strike-days	Highly likely	cloud-to-ground strikes on 1 or more days per year

NOAA NCEI, NOAA NCEI Storm Events Database, details files (csvfiles v1.0), version c20260918, pulled 2026-09-28, <https://www.ncei.noaa.gov/pub/data/swdi/stormevents/csvfiles/>

Intensity bands: historical frequency (Storm Events)

Hazard	Band	Years	Events <i>county-coded records</i>	Years in period	Events per year <i>events / years</i>
Hail	1.00-1.99 in	1996 to 2025	13	30	0.433
Hail	2.00 in+	1996 to 2025	0	30	0
Strong Wind (Thunderstorm Wind records)	50-64 kt	1996 to 2025	58	30	1.93
Strong Wind (Thunderstorm Wind records)	65 kt+	1996 to 2025	3	30	0.1
Strong Wind (Thunderstorm Wind records)	unmeasured or below 50 kt	1996 to 2025	12	30	0.4

Hazard	Band	Years	Events <i>county-coded records</i>	Years in period	Events per year <i>events / years</i>
Tornado	EF0-1	1996 to 2025	2	30	0.0667
Tornado	EF2-3	1996 to 2025	0	30	0
Tornado	EF4-5	1996 to 2025	0	30	0
Tornado	unrated (EFU)	1996 to 2025	0	30	0

Hail smaller than 1 inch is not counted: on 2010-01-05 the National Weather Service raised its severe-hail threshold from 3/4 inch to 1 inch, so smaller reports became less common after 2009 (NWS Service Change Notice 09-52). NRI hail frequency uses a 0.75 inch threshold.

NOAA NCEI, NOAA NCEI Storm Events Database, details files (csvfiles v1.0), version c20260918, pulled 2026-09-28, <https://www.ncei.noaa.gov/pub/data/swdi/stormevents/csvfiles/>

Optional: future conditions. Not a required item in the 2025 FEMA Local Mitigation Planning Policy Guide; some states ask for it. The federal Climate Mapping for Resilience and Adaptation (CMRA) site gives county exposure to future climate conditions.

Supports B1-f: variation across the planning area

Range of census tract risk within the county

Hazard	Tracts <i>rated of all</i>	Risk score min <i>NRI score, 0 to 100</i>	Median	Max	Tracts by rating	Note
Avalanche	6 of 7	48.7	50.2	51.2	Very Low 6, Not Applicable 1	
Coastal Flooding	0 of 7				Not Applicable 7	
Cold Wave	7 of 7	48.2	58.7	67.3	Relatively Moderate 7	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Drought	0 of 7				No Rating 7	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Earthquake	7 of 7	28.1	48.7	62.9	Relatively Low 5, Very Low 2	
Hail	7 of 7	24.6	30.4	35.8	Very Low 7	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Heat Wave	7 of 7	10.4	18.2	27.1	Relatively Low 5, Very Low 2	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Hurricane	7 of 7	57.6	64.6	75.8	Relatively Low 7	
Ice Storm	7 of 7	49.4	63.5	81.8	Relatively Moderate 3, Relatively Low 4	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.
Inland Flooding	7 of 7	42.4	66.0	93.3	Relatively High 2, Relatively Moderate 4, Relatively Low 1	
Landslide	7 of 7	88.0	92.5	96.4	Relatively Moderate 1, Relatively Low 6	
Lightning	7 of 7	66.9	80.4	89.3	Relatively High 4, Relatively Moderate 3	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.

Hazard	Tracts <i>rated of all</i>	Risk score		Median	Max	Tracts by rating	Note
		<i>min</i>	<i>NRI score, 0 to 100</i>				
Strong Wind	7 of 7	49.6	62.9	78.0	Relatively Moderate 6, Relatively Low 1	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.	
Tornado	7 of 7	18.7	25.0	30.0	Relatively Low 2, Very Low 5		
Tsunami	0 of 7				Not Applicable 7		
Volcanic Activity	0 of 7				Not Applicable 7		
Wildfire	7 of 7	60.1	63.0	71.1	Relatively Low 2, Very Low 5	National data give a county-wide or coarse (49 km grid or NWS zone) frequency for this hazard, so they cannot show members' hazard differing. The tract range above mostly reflects where buildings and people are. Confirm locally.	
Winter Weather	7 of 7	94.1	96.9	98.7	Very High 5, Relatively High 2		

County tracts, shown for context: this town's planning area is the town, which the county tracts do not split out.

Rated tracts only: No Rating (score 0.0), Not Applicable and Insufficient Data tracts are counted but not used for the minimum, median and maximum.

SOURCE
FEMA, FEMA National Risk Index 1.20.0 (December 2025), county and census tract tables, version 1.20.0, pulled 2026-09-28, https://www.fema.gov/about/reports-and-data/openfema/nri/v120/NRI_Table_Counties.zip (download, 25 MB), https://www.fema.gov/about/reports-and-data/openfema/nri/v120/NRI_Table_CensusTracts.zip (download, 635 MB)

Per-member block (Starter, confirm locally)

Member	Type	Plan status	Repetitive loss	Public Assistance matched	Event records naming this place	Notes
			<i>FMA RL and SRL (44 CFR 77.2); repeat-flood, any definition</i>	<i>federal share obligated, nominal dollars</i>	<i>all years; since the member's plan</i>	
Hyde Park town	Town	Approved, expires 2031-08-31	FMA RL 0, SRL 0; any 1	\$1,866,973.20	12; not yet covered	

Member rows are whole NFIP communities and need not add up to the county total: a community that extends into another county is counted in full on each member row, while the county table counts only its part in this county.

School districts and special districts get a plan clock row only.

Supports B2-a and B2-b: assets and impacts

Inherited from Lamoille County, county-level (county FIPS 50015); scope: NRI exposure and expected annual loss; since-plan figures use the town's own approval date.

Local data required

County-level starter. The plan must describe impacts for each participant and its own assets.

- Critical facilities and lifelines per hazard
- A problem statement per participant per hazard
- Changes in development in hazard-prone areas since the last approval, or a statement of none (E1-a)
- Future assets

Lamoille County, county-level

Hazard	Building exposure <i>modeled dollars</i>	Agriculture exposure <i>modeled dollars</i>	Population exposed <i>people</i>	EAL buildings <i>modeled dollars per year</i>	EAL agriculture <i>modeled dollars per year</i>	EAL population equivalence <i>statistical value of life and injury, \$13.7M per life, not property damage</i>	EAL as % of exposure <i>buildings; agriculture where noted</i>	Storm Events damage since 2026-09-01 <i>county-coded records, property plus crops, nominal dollars</i>	Zone-level damage since plan <i>property plus crops, reported for the zone</i>	Public Assistance since plan <i>nominal dollars; see note</i>	Note

Tsunami											Not Applicable in NRI for this county
Volcanic Activity											Not Applicable in NRI for this county
Wildfire	\$5,724,954,256	\$24,030,748	18,295	\$6,839	\$2	\$429	0.000119%				
Winter Weather	\$8,651,881,013	\$35,714,028	25,919	\$99,497	\$62	\$207,030	0.00115%				

Every dollar figure in this table is for the whole county; only the since-plan date is the town's own approval date.

Totals since 2026-09-01: Storm Events not yet covered: Storm Events data run through 2026-06-30, before the approval date, so there is no period to count yet; Public Assistance on counted declarations none found (0 declarations, 0 with PA).

Total = buildings + agriculture + population equivalence; FEMA values each expected death (or 10 injuries) at \$13.7 million (2024 dollars).

FEMA does not split Public Assistance by hazard. A declaration mapped to several hazards is listed under each of them with its full amount, so the per-hazard column must not be added up; the unit total counts each declaration once.

Dollars are nominal (as reported), labeled with the year; not adjusted for inflation.

Supports B2-a: context

Inherited from Lamoille County, county-level (county FIPS 50015); scope: whole section.

County context

Measure	Value
Population	25,919
Building value (total, not at risk)	\$8,651,881,013
Agriculture value (total, not at risk)	\$35,714,028
NRI risk rating (all hazards)	Very Low
Expected annual loss, buildings and agriculture, all hazards	\$9,231,288
Expected annual loss, population equivalence, all hazards (NRI values each statistical life at \$13.7M; a modeled value of expected deaths and injuries, not property damage)	\$1,346,329
Social vulnerability rating	Very Low
Community resilience rating	Very High
NRI version	December 2025

FEMA's all-hazard expected annual loss total adds buildings, agriculture and population equivalence; the two parts are shown separately so the property figure is not read as including the statistical value of life.

JOHNSON, VILLAGE OF	0	2	4	2	4	0	2

SOURCES

FEMA, OpenFEMA NfipMultipleLossProperties v1, version 2026-08-04T164045Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/NfipMultipleLossProperties> (API)

FEMA, OpenFEMA HazardMitigationPlanStatuses v1, version 2026-09-26T121003Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/HazardMitigationPlanStatuses> (API)

Repeat-flood properties by plan member (NFIP community)

Member	NFIP community ID	RL, FMA <i>properties</i>	SRL, FMA <i>properties</i>	RL, NFIP <i>properties</i>	SRL, NFIP <i>properties</i>	Any category <i>properties</i>	Mitigated <i>properties</i>	Currently insured <i>properties</i>	Note
Hyde Park town	500230	0	0	1	0	1	0	1	

Per-member types: XLSX sheet 'B2-c Members'.

Member rows are whole NFIP communities and need not add up to the county total: a community that extends into another county is counted in full on each member row, while the county table counts only its part in this county.

SOURCES

FEMA, OpenFEMA NfipMultipleLossProperties v1, version 2026-08-04T164045Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/NfipMultipleLossProperties> (API)

FEMA, OpenFEMA HazardMitigationPlanStatuses v1, version 2026-09-26T121003Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/HazardMitigationPlanStatuses> (API)

County repeat-flood properties by occupancy group

Occupancy group	RL, FMA <i>properties</i>	SRL, FMA <i>properties</i>	RL, NFIP <i>properties</i>	SRL, NFIP <i>properties</i>	Any category <i>properties</i>	Mitigated <i>properties</i>	Currently insured <i>properties</i>
single-family residential	0	1	9	1	9	0	4
2 to 4 unit residential	0	1	5	1	5	0	4
other residential	0	0	0	0	0	0	0
non-residential	0	1	3	1	3	0	2
not reported	0	0	0	0	0	0	0

Institutional properties cannot be separated in this data: FEMA's occupancy groups have no institutional class, so they fall in non-residential or other residential in the table by occupancy group.

SOURCES

FEMA, OpenFEMA NfipMultipleLossProperties v1, version 2026-08-04T164045Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/NfipMultipleLossProperties> (API)
FEMA, OpenFEMA HazardMitigationPlanStatuses v1, version 2026-09-26T121003Z, pulled 2026-09-28, <https://www.fema.gov/api/open/v1/HazardMitigationPlanStatuses> (API)

FMA RL and FMA SRL are the Flood Mitigation Assistance definitions (44 CFR 77.2), the ones the FEMA Local Mitigation Planning Policy Guide cites; OpenFEMA's fmaRI field description omits the Increased Cost of Compliance clause of 44 CFR 77.2(i). NFIP repetitive loss (FEMA insurance definition, nfipRI) is 2 or more claims over \$1,000 in 10 years and can drop to false when a property is mitigated. Also shown: NFIP severe repetitive loss, any category, mitigated and currently insured.

Your state NFIP coordinator's list may use the NFIP insurance definition, so its counts can be higher.

Counts are aggregates of FEMA's public NFIP Multiple Loss Properties file (as of 2026-08-02). No property is identified. County assignment is FEMA's geocode.

Counts may differ from your state NFIP coordinator's list, which is the source the Handbook names.

In this county 0 properties are FMA repetitive loss but not NFIP repetitive loss, and 17 properties are NFIP repetitive loss but not FMA repetitive loss.

Exact counts; no count suppression.
